INFORMATION TO USERS

This dissertation was produced from a microfilm copy of the original document. While the most advanced technological means to photograph and reproduce this document have been used, the quality is heavily dependent upon the quality of the original submitted.

The following explanation of techniques is provided to help you understand markings or patterns which may appear on this reproduction.

1. The sign or "target" for pages apparently lacking from the document photographed is "Missing Page(s)". If it was possible to obtain the missing page(s) or section, they are spliced into the film along with adjacent pages. This may have necessitated cutting thru an image and duplicating adjacent pages to insure you complete continuity.
2. When an image on the film is obliterated with a large round black mark, it is an indication that the photographer suspected that the copy may have moved during exposure and thus cause a blurred image. You will find a good image of the page in the adjacent frame.
3. When a map, drawing or chart, etc., was part of the material being photographed the photographer followed a definite method in "sectioning" the material. It is customary to begin photoing at the upper left hand corner of a large sheet and to continue photoing from left to right in equal sections with a small overlap. If necessary, sectioning is continued again - beginning below the first row and continuing on until complete.
4. The majority of users indicate that the textual content is of greatest value, however, a somewhat higher quality reproduction could be made from "photographs" if essential to the understanding of the dissertation. Silver prints of "photographs" may be ordered at additional charge by writing the Order Department, giving the catalog number, title, author and specific pages you wish reproduced.

Abstract

Author: James A. Rimbach, B.A., S.T.M.

Title: Animal Imagery in the Old Testament: Some Aspects of Hebrew Poetics

A doctoral thesis submitted in the Department of Near Eastern Studies, The Johns Hopkins University, 1972.

For the purpose of this study in the imagery of Old Testament poetry, the corpus of animal imagery has been chosen as an easily definable and manageable body of material, represented in all periods of Hebrew poetry and in the majority of the books of the Old Testament. Expectations for the elucidation of this material has traditionally been set on the efforts of students of natural history. The present study is written in the conviction that attention to literary form, style and convention is just as helpful, if not even more so, to the interpreter of the Biblical text.

The thesis explores the varieties of relationship between some known forms of Hebrew verse structure, particularly parallelismus membrorum, and the vocabulary of poetic imagery. In casting his imagery in the most common denominators of Hebrew poetry, the single bi-colon and double bi-colon, the poet evidences clear

patterns in the choice of his vocabulary. These patterns are detailed in the "Conclusions" of the study. Though considerably less material is available that extends beyond the double bi-colon, certain observations governing the structuring of the imagery may be made in these cases also.

Attendant problems in any study of Hebrew poetry are likewise dealt with in the thesis, not the least among them being the difficulty of translation itself. Some of the passages involved are cruces of translation and are treated at some length. In certain cases new solutions to translation and meaning are offered, and in other instances the results of the present study lend heavy support to one proposal out of the many heretofore offered.

The conventionality of much animal imagery emerges clearly. When certain animal imagery is utilized by various authors at widely different times and places, the point of comparison is relatively constant, and often much of the detail as well. This principle of conventionality may thus be applied in the investigation of passages of heretofore contested meaning and often permits a solution to the meaning and import of certain Biblical passages. Such constants of imagery are the use of certain groupings of animals to form

descriptions of various geographical locales; the desolations following war, both in retrospect and in threat; and the description of paradisaical landscapes.

These literary conventions can in some cases be shown to extend beyond Hebrew literature to the literatures of neighboring Semitic speaking peoples of the ancient Near East. This observation is naturally important for the interpreter of the Old Testament and gives insight not only into the meaning of individual passages but has implications for the literary standing of the various authors of Old Testament poetry and their schooling in the literatures of the ancient world.

One observation running throughout the study is a testing of a dictum that is familiar to all students of the literature of the Old Testament, namely, that Hebrew imagery is "concrete" as opposed to being "abstract." Our study indicates quite the opposite. It is here maintained that the so-called "concrete imagery" of Hebrew poetry functions as a true abstraction by virtue of its conventional nature, and hence evokes from the hearer and reader a complex of reference extending far beyond the detail offered in any particular case.

Introduction

Imagery is a prominent feature of the poetry of the Old Testament, as of all poetry. As such it has been the subject of assertions and generalizations of the broadest scope. Systematic investigations are almost entirely lacking. The primary hazards involved in the study of Hebrew poetic imagery are due to the material itself and are of a nature which often prevent the application of methods and procedures used in the investigation of the poetry of other cultures and other times.¹

Standard sources on Old Testament literature often make reference to the work of Eduard König, Stilistik, Rhetorik, Poetik in Bezug auf die biblische Literatur (Leipzig, 1900). There one finds an exhaustive listing of examples under the various subdivisions of classical rhetorical terminology. The value of the work is undermined by the absence of any justification of the application of the categories of classical rhetoric to Hebrew literature.² König's work has been justly characterized as being as useless as it is enormous.³

The approach followed in this study builds upon procedures which in their application to other restricted bodies of material in the Old Testament have proved fruitful in advancing understanding and apprecia-

tion of the text. Imagery involving animals has been selected because it forms a convenient whole of manageable and quite easily defined proportions. In the main the passages involved are clear; but exegetical and philological problems do occur and are treated with varying degrees of thoroughness without, it is hoped, obscuring the direction of the study.⁴ The animal imagery of the Song of Songs has been omitted from the study, for several reasons. Most of the imagery of the Song of Songs is unique to those poems, and my investigation of this material persuades me that the total imagery of the Song must be dealt with as a unit in itself, and not piecemeal.⁵ Those few instances of animal imagery in the Song which have parallels elsewhere in the Old Testament do fit the conventions which emerge from the study of animal imagery as a whole.⁶ Indeed, it would seem that the views of the literary world regarding Hebrew poetry have been greatly influenced by a certain preoccupation with the Song of Songs. When, for example, T. J. Meek remarks that the poetry of the Song is "full of elaborate imagery, with extravagant, sometimes overbold metaphors,"⁷ he illustrates the common practice of making pronouncements regarding Hebrew poetry and especially its imagery in purely aesthetic terms.⁸

One generalization in particular which needs to be tested in our survey of animal imagery is the oft-cited cliché that Hebrew imagery is "concrete" rather than "abstract" in nature. The origin of this assertion may be traced back to J. G. Herder, and its influence on Old Testament scholarship comes from the writings of Herder's friend J. G. Eichhorn. The quality of the "abstract" should not be confused with or confined to ideas expressed by words of a certain grammatical category. We shall see in the course of our investigation that the so-called "concrete or pictorial image" functions as an "abstraction" because it can be repeated and be understood without reference to any particular. Both the writer and reader are aware of the "system of associated commonplaces" by which what one may term a concrete image actually functions as a literary convention which does not call upon the personal experience or natural observation of either party.

A second concern of our study is to illustrate the dominant role of literary convention in poetic imagery. This feature may be seen not only within the confines of the poetry of the Old Testament, but in many cases applies to the literature of the ancient Semitic speaking world in general.⁹

Thirdly -- and this is the chief contribution of our study -- we observe certain relationships between recognized categories of poetic line structure and the vocabulary of poetic imagery. A summary of the findings is given separately as "Conclusions" following the body of the text.

It should be noted that the sectional division of the Old Testament material in the main portion of the study is not intended to reflect the exactitudes of taxonomical classification, but represents only the broad categories of classification of animals which partly emerges from the material itself and is in other instances quite arbitrary.

Notes to Introduction

1

Chief among these is the handicap of the extreme difficulty, and often impossibility, of dating the material, or determining with confidence its authorship. Even where this goal may be approached, constructing a chronological progression of material assigned to a single author presents an even greater and virtually unachievable task.

2

For example, should one distinguish, in Hebrew poetry, "simile" from "metaphor?" And on what grounds? If simile is to be, perhaps, marked by the presence of the particle k, -- this is seriously undermined by the Hebrew grammatical phenomenon of the "double-duty" use of prepositions (see, e.g., M. Dahood, Psalms, III, Anchor Bible 17A (New York, 1970), p. 436, "Grammar of the Psalter"). The presence or absence of the preposition may be determined by metrical and stylistic considerations, in addition to grammatical ones.

3

See the comments of L. Alonso-Schökel in his article "Poésie hébraïque," in Dictionnaire de la Bible, Supplément (ed. L. Pirot, A. Robert and H. Cazelles; Paris, 1967), fasc. 42, col. 49.

4

It should be noted that our concern is not that of "natural history." Problems in the taxonomic classification of Biblical fauna are mentioned only in passing, if at all.

5

G. Gerleman, Das Hohelied, BKAT XVIII (Neukirchen, 1965), is, in my opinion, by far the best available treatment of the book in view of its discussions of poetic imagery.

6

The stag and gazelle are used to depict speed (2:9; 2:17; 8:14); certain exotic geographical locations are characterized by the fauna which inhabit them (4:8); the fox portrays mischievousness (2:15).

7

T. J. Meek, The Song of Songs, IB V (New York, 1956), p. 92.

8

For documentation of this approach see the work of R. P. Lessenich, Dichtungsgeschmack und althebräische Bibelpoesie im 18. Jahrhundert, Anglistische Studien, 4 (Köln; Graz, 1967), especially section II, "Die Bildhaftigkeit der althebräischen Dichtungssprache von Cotin bis Pratt und Eichhorn," pp. 24-104.

9

In giving examples of extra-Biblical literature, Akkadian is drawn on most frequently, due chiefly to the availability of a great mass of the literature. Ugaritic and Aramaic literatures are also utilized. The corpus of Egyptian literature is excluded, as I have no knowledge of the Egyptian language. The reader who is interested in this comparative material may consult the work of H. Grapow, Die bildlichen Ausdrücke des Aegyptischen (Leipzig, 1924).

Literature is cited from the most conveniently available sources. Where documents are translated in Pritchard's Ancient Near Eastern Texts Relating to the Old Testament (ANET), references are given to that work. Particularly helpful for Mesopotamian literature in general is W. Heimpel, Tierbilder in der Sumerischen Literatur, Studia Pohl 2 (Rome, 1968), especially as many of his Sumerian references are from Sumero-Akkadian bilingual texts.

The Animal Imagery of the Old Testament

A. Insects

Aside from the descriptions of the Exodus plagues, the LOUSE appears only once in the Old Testament as a figure for the ease with which life may be terminated.

For the heavens will be dispersed like smoke,
And the earth shall disintegrate like a garment,
And her inhabitants will die like lice
(Isaiah 51:6).

See also the occurrence of the MOTH in Isaiah 51:8. Isaiah's repeated use of the image of insects in these verses serves to stress the difference between the divine and human spheres. In both cases, sayings about insects are balanced by the phrase, "My victory will be forever."

[On the form kēn, see C. Rabin, "Etymological Miscellanea," Scripta Hierosolymitana VIII (1961), 392. Note also the suggestion of G. R. Driver reported in C. R. North, The Second Isaiah (Oxford, 1964), p. 207: kammôkēn, "like (spawn of) locusts," comparing an Arabic makin.]

S. E. Loewenstamm¹ has discerned the influence of poetic structure upon vocabulary when he argues, cor-

rectly in my opinion, that the two terms ‘ārōb and kinnîm in Psalm 105:31 refer to one plague, and are chosen as two representatives of the class of pestiferous insects.²

He spoke, and there came swarms of flies,
-- lice throughout their territory.

This is important in the evaluation of the number of plagues in the "plague tradition" as it is variously represented in the Book of Exodus, Psalm 78 and Psalm 105. His conclusion is that "the narrative of the Pentateuch results from an amalgamation of all variants of the plague traditions."³

There are eleven terms used for members of the LOCUST family in the O.T. This in itself is a testimony to the degree of acquaintance by Scriptural writers with the frequent depredations brought about by locust plagues in the ancient East (such plagues have come under some measure of control only in the most recent times). Indeed, Isaiah 18:1 seems to indicate a recognition of the geographical home of the destroying hoards in the Sudan. For literary use, however, only a few of these terms come into play. As with other animals, it is the obvious, or commonly observed features that are utilized in metaphor, and such comparisons preclude the necessity of making fine distinctions in the naming

of members of the species. In fact, the characteristics mentioned, even in connection with different names, are such as are common to all.

The metaphoric characteristics of the locust are:

A.] (a characteristic shared with other insects) ..
its small size indicates something insignificant.

He is enthroned on the vault of the earth,
And its inhabitants are (to Him) like
grasshoppers (kahagabim) (Isaiah 40:22).

Similarly, the Israelite spies emphasize the stature of the inhabitants of Canaan by reporting, "We seemed to ourselves like grasshoppers, and so we seemed to them" (Numbers 13:33).

B.] The most frequent usage of locust imagery is to emphasize multitude, and this intention is specifically stated.

(The Midianites would come in) like locusts in multitude, and they and their camels were innumerable (Judges 6:5).

The same is repeated in Judges 7:12, coupled with "the sand of the sea-shore in number." Jeremiah says of the Assyrian army advancing on Egypt, "For they are more numerous than locusts -- they are without number" (Jeremiah 46:23). The hosts of the Medes to fall upon Babylon is similarly compared.

Yea, I will fill you with⁴ men as with locusts (Jeremiah 51:14).

The same employment of locusts imagery is seen in the Assyrian royal inscriptions. Sargon writes,

With the mass of my troops, as with locusts,
I covered the city.⁵

Ashurbanipal says of the spoil of war:

As booty, I carried off to Assyria horses,
mules, asses, oxen and sheep, more numerous
than locusts.⁶

Similar imagery is used in Sumerian literature. The examples listed by Heimpel⁷ (p. 445, No. 78) refer to locusts as an image of great numbers of slain in battle (78. 1-3) or the numerous hosts of the attacking enemy (78.4).

The Ugaritic epic of King Kirta says of his army:

like the locust (*?irby*) they cover the field,
like the swarm (*hsn*) the extremities of the
desert.
(CTCA 14:103-105; 192-94)

A second from Ugaritic involving the locust occurs in a description of the warlike goddess Anat:

Beneath her like balls were heads;
Above her like locusts were hands,
Like locusts' eggs heaps of warriors' hands.
She attached heads to her back,
Girded hands to her waist.
(CTCA 3, B, 9:13)

The passage may be purely descriptive, the "necklace" of human hands strung together in a manner reminiscent of that in which locusts were threaded or skewered for roasting. This seems most likely in view of what is said of the skulls, which hung

about her lower body like the decorative balls of a sash. The description may be visualized by reference to representations of the Indian goddess Kali.⁸

C.] The destructiveness of the locust swarm is another feature prominently mentioned in the O.T. Some passages speaking to this point must be taken as descriptions of actual plagues (so Exodus 10:4-19; and, in particular, the book of Joel). Elsewhere, we read:

The sword will cut you off,
It will devour you like the locust (Nahum 3:15).⁹

Spoil is gathered as one gathers locusts,
Like the onslaught of locust swarms,
they rush upon it (Isaiah 33:4).¹⁰

The picture here of people plundering a defeated enemy in the manner in which a locust swarm devours crops (second colon) is cleverly joined with the image of gathering booty together much as locusts are swept and shoveled into heaps (first colon). The double metaphor remains clear in spite of the numerous difficulties of the passage. The identity of the enemy is entirely unclear; the section 33:1-6 is of dubious Isaianic origin and contains several abrupt transitions of thought which confound analysis.

Nahum 3:17 compares the inhabitants of Nineveh to locusts on two counts, the one balancing out the other. Though they be as numerous as a locust swarm (verse 16) they can disappear without a trace, as the locust swarm which has huddled in inactivity because of cold weather quickly disappears when warm temperatures set in (verse 17).¹¹

The first two chapters of the book of Joel contain a description of an actual plague of locusts which aids us in appreciation of locust imagery elsewhere, but is itself not metaphorical. The key to Joel's prophecy is his perception of the plague as an instrument of Yahweh. This is stated most explicitly in 2:25, "my great army which I sent against you" (Compare Deut. 28:42 and Amos 4:9). However factual Joel's description may be, it is also cast in poetry, and this latter fact bears on our evaluation of his writing. Concerning the four terms for locust which Joel utilizes, D. R. Jones aptly remarks, "The four terms are probably used rhetorically to exhaust the category, and to emphasize how systematic and total was the destruction they wrought."¹²

A wisdom saying about the locust stands apart from the imagery in other literary genres. As with other insects, their pestilential nature is ignored and certain observable qualities of their behavior, primarily their

societal behavior, are mentioned and commended as a source from which man can learn about his own society.

The locust swarm has no king, yet it all advances in divisions (Proverbs 30:27).¹³

The phrase w̄yistabbēl hehāgāb in Eccl. 12:5 has consistently resisted all efforts of exposition. Commentators have traditionally seen in this and the preceding verses veiled allusions to the failing of the human senses under the advance of old age. Many have seen in verse 5 a reference to the failing of sexual vitality, but without sound justification for the specific imagery. It seems more lucid, to this writer, to see in verse 5a a statement about the renewal of nature each springtime, to be contrasted with the statement in 5b, "(But) surely, man goes to his grave (bêt ôlāmô)."

Hence the translation:

For the almond tree may blossom
The squill (-plant) resume its burden
And the caper bush may bud again,¹⁴

reading h̄šābl̄ for hāgāb. What is required by the context is the name of some plant which is dormant in the winter and bursts forth anew in the spring.

The ANT is mentioned in two wisdom sayings from Proverbs. The first, Proverbs 6:6-11, is particularly interesting for our study of animal imagery, for it makes explicit the reason for the frequency of animals

among wisdom sayings and proverbs, namely, that the careful observation of animal behavior gives, by analogy, insight into the successful workings of human society -- that is, it leads to wisdom.

Go to the ant, you loafer!
Observe her ways and become wise!
Though she has no chief, overseer, or ruler,
She makes sure of her food in the summer,
She gathers in her provisions at harvest time.
How long will you lie there, you loafer?
How long until you rise from your sleep?
"A little more sleep, a little more slumber,
A little longer with hands folded in repose"--
And poverty will come upon you like a vagabond,
And destitution like a beggar.¹⁶

How badly the loafer needs wisdom in this regard is seen by a glance at Proverbs 20:4, "The loafer does not plow in the autumn; he will seek at harvest and have nothing."

The second saying, Proverbs 30:25, stresses the same quality of ants.

[The extra-Biblical ant imagery is different in that no wisdom sayings are attested, with the possible exception of the saying from the Amarna letter (W. F. Albright, "An Archaic Hebrew Proverb in an Amarna Letter from Central Palestine," BASOR 89 (1943), 29-32), but they are consonant with other similes utilizing insect imagery; e.g., "serpents and scorpions like ants," (Borger, Esarhaddon, p. 56) must refer to their number.]

The picture of persistent harrassment is supplied by the BEE.

(The Amorites) pursued you like bees do
(Deut. 1:44).

(My enemies) surround me like bees (Psalm 118:12).¹⁷

A passage which has attracted a great deal of interest is Isaiah 7:18-19: "In that day Yahweh will whistle for the fly which is at the sources of the streams of Egypt, and for the bee which is in the land of Assyria. And they will come and settle in the steep ravines and in the clefts of the rocks, and on all the thornbushes, and on all the pastures." From similarities in terminology with Isaiah 5:26f. (šrq), and from verse 19 itself, the picture seems simply to refer to the innumerable hoards of foreign armies. This is consonant with other imagery involving insects. Attempts to find some special symbolism in the bee and the fly are probably looking for too much, and have been influenced by conjectures about the false reading WASP -- see below. In the absence of any indication to the contrary, we should interpret the metaphor by the most common denominator of this type of imagery, i.e., great numbers indicated by insects. This would also be suitable, incidentally, for the famous reference in the eleventh tablet of Gilgamesh (line 161) "The gods crowded like flies about the sacrificer," [ANET p. 95] that is, a great number of gods were present.¹⁸

[Here may be mentioned the harrassment of the mosquito (?) (qeres -- Jeremiah 46:20 only). The point of comparison seems at first reading to be petty annoyance (a gadfly/mosquito on a calf), but verse 22 follows specifying that the enemy comes in strength and verse 23 states that they are more numerous than locusts, thus confounding the issue. Compare Odyssey XXII, 299f., "They scattered through the hall like a herd of cattle whom the dancing gadfly has attacked and stampeded.]

[The translation of sir'ah by WASP in LXX seems to be based on a Jewish tradition, but has no sound philological basis. There is no Semitic etymology for the word as an animal name. I would agree with Koehler that sir'ah means "discouragement," or the like.

Note Arabic zara'a "was humble, abased" (Lane's dictionary, 1787a). Exodus 23:27-28 lists three items: 'emāti, "I will send my terror before you;" hammōti, "I will throw all the people into confusion;" and v. 28, "I will send sir'ah before you." See L. Koehler, "Hebraische Vokabeln I," ZAW 54 (1936), 287-293 and KB² s.v. G. von Rad, Der Heilige

Krieg im alten Israel (4th ed.: Göttingen, 1965), p. 10ff., discusses this aspect of the holy war and brings together the pertinent parallels.]

Mention of the MOTH points to the inevitable destruction which comes to frail man as it does to his frail garments, which suffer the depredations of the moth and its larvae.

Behold, all of them shall disintegrate like a garment,
The moth shall eat them (Isaiah 50:9).

A fully balanced construction occurs in Isaiah 51:8:

For the moth ('āš) shall eat them like a garment,
And the worm' (sās, moth larvae) shall eat them like wōl.¹⁹

A third variation is presented in Job:

He will disintegrate like a skin-bag²⁰
Like a garment which the moth has eaten
(Job 13:28).

In view of the foregoing, we are probably to see an indication of clothing in the phrase

Like a moth you cause his finery to disintegrate. (Psalm 39:12)²¹

A similar saying is found in the Gilgamesh Epic:

Vermin (kalmatu) are devouring (Enkidu's corpse) as though it were an old gar [ment] (Gilgamesh XII:94).²²

We should call attention here to the line in the Sefire Steles which enumerates devouring animals (Sefire A, I, 31). As given by Fitzmeyer the line reads:

May the mouth of a snake (hwh) eat, the mouth of a scorpion ('qrb), the mouth of a bear (dbhh), the mouth of a panther (nmrh): And may a moth (ss) and a louse (qml) and a [... become] to it a serpent's throat:²³

Remarking on the strange form dbhh, Fitzmeyer notes that Dupont-Sommer considered the reading certain, but preferred to correct it to dbrh, "bee."²⁴ This is not entirely accurate. The photographs do indicate damage at this point of the text, and Dupont-Sommer remarks only on the final h.²⁵ Further, the reading nmrh is even more uncertain (only the nm can be read on the photographs by the writer). Dupont-Sommer's edition was more cautious, reading n̄mrh̄). If we then have the progression; snake, scorpion, ?, ?, moth, louse, it is more suitable to the context to read dbrh and nmlh, "bee" and "ant," i.e., additional names of insects. "Bear" and "panther" do not suit the context at all. References to Sefire II, A, 9 do not help determine the reading "panther," since it is mentioned there alongside a lion, of which there is no mention in Sefire A, I, 31. wpm is not repeated with the last two items in the series, which supports the idea that they form a natural grouping.²⁶ Here too, the progression "ant, moth, louse" must be favored over "panther, moth, louse."²⁷

Two sayings in the Wisdom literature concerning the moth strike a different note. The first is concerned with the temporary nature of the spun-cocoon of the moth larva.

He builds his house like a moth,
like a booth which a watchman makes
(Job 27:18).

The context of this verse points decisively to the temporary nature of the abode in question as the point of comparison, and has nothing to do with its frailty.²⁸ The rich man has only a few years to live in his house like the brief period during which the watchman lives in his booth in the fields in harvest time and like the short time the moth spends in the cocoon. The reading of LXX ("spider") is not preferable, and has been taken from Job 8:14, where, however, the point of the passage is quite other. (See SPIDER below).

Job 4:19 is more difficult. Contrasting the divine sphere with the human, the author states:

How much more (insecure) those who dwell in
houses of clay (=the human body),
Whose origins (litt: foundations) are in the dust.
They are crushed before the moth.

M. Pope (Job, Anchor Bible 15 [Garden City, N.Y., 1965], p. 38) translates "as quick as a moth" without any explanation. The suggestion of Fohrer (Das Buch Hiob, KAT XVI [Gütersloh, 1963], p. 131) that the last phrase is a "bildhaft-erläuternde Glosse" is difficult to follow,

as the phrase defies translation. The verse is undoubtedly corrupt. The remnants of the missing second colon may be concealed in the mbl̄y m̄ȳm of the following verse, which reads better without it. I suggest the reading:

<u>yedukke,</u> ²⁹ millipn̄e 'ōsam	<u>bēl̄i-m ūm̄</u>
<u>mibōqer lā 'ereb yukkanṭū</u>	<u>lāncṣāḥ yō'bēdū</u>

and translate:

They are crushed before their maker;
 They are without a name.
 In the space of one day they are cut off;
 They perish forever.

Thus we achieve two bi-cola of (3+2) (3+2) beats.

The enclitic mem with bēl̄i seems to serve as a balancing element in the lack of any specific pronominal or suffixal particle in the second colon.³⁰ This leaves us with Hosea 5:12 (RSV):

Therefore I am like a moth to Ephraim,
 and like dry rot to the house of Judah.

Driver has made the suggestion, widely adopted, that the word āš here does not mean "moth," but "pus," "putrifaction," or the like, which, he claims, makes a better parallel to the "rotteness" (rāqāb). The supporting arguments are weak, such as the fact that moths do not attack men -- repeated with approval by Rudolph, Hosea, KAT XIII,1 (Gütersloh, 1966), p. 124.

Similarly H. W. Wolff, Dodekapropheton I, Hosea, BKAT XIV, 1 (Neukirchen, 1961), p. 146, who says that the figure of the moth in comparison with men serves only to emphasize their "schnelle Vergänglichkeit" and lists after this Isaiah 50:9 and Job 4:19; he then concludes that "ferner zerstört sie nicht Menschen, sondern Gewänder" and lists Isaiah 50:9 and 51:8 -- texts which both state that men will be eaten by moths! The point of the verse is not that Yahweh is a moth, but that he is like a moth, i.e., causes dissolution and decay. The verse reads well as it is. There is no need to unnecessarily proliferate homographs and homophones to explain phrases that are intelligible without such devices.

The tiny FLEA, as befits it, serves as an image for someone insignificant, when David addresses Saul,

After whom has the king of Israel come out?
After whom do you pursue?
After a dead dog! After a flea!
(I Samuel 24:15).

The use of the verbs yāṣa' and rādāp heighten the imagery. The king of Israel mounts a major military expedition after an insignificant object who poses no real danger to him.

[The occurrence of par'ôš in I Samuel 26:20 is intrusive and has been introduced from our passage cited here. See S. R. Driver, Notes

on the Hebrew Text and the Topography of the Books of Samuel (2nd. ed.; Oxford, 1913, 208f.)

We have already met the FLY in connection with the BEE. There is in addition one wisdom saying of Qoheleth 10:1 which mentions the fly.

Dead flies make to stink--³¹
 (and) ferment the oil of the perfumer.
 A little folly may outweigh wisdom and honor.

The picture is that of the "dying" fly, who has fallen into the oil and is consequently trapped there by the heavy liquid. For the comparison, Hertzberg aptly remarks, "Genauso wie tote Fliegen, also eine quantité negligieable, die wohlriechende Salbe verderben können, ist schon ein wenig Torheit imstande, sich der ihr an sich doch überlegenen Weisheit überlegen zu zeigen."³²

The WORM (tôlê'âh) and MAGGOT (rimmâh) may be considered together. Associated with the noun rimmâh is the verb râmam (Exodus 16:20: "it became wormy with maggots.") The combination rimmâh wetôlê'âh ("maggot-worm") is broken up in adjacent cola, but both words refer to the same thing.³³

How much less man, who is a maggot,
 And the son of man, who is a worm
 (Job 25:6).

Compare Psalm 22:7, "I am a worm and not a man;" and Isaiah 41:14, "Fear not, O worm Jacob -- O vermin, Israel."³⁴

A different picture is that of Isaiah 14:11:

Maggots are the bed beneath you,
And worms are your covering.

Two uses may be separated. A) To stress the lowly and insignificant position of man (Job 25:6; Psalm 22:7; Isaiah 41:14); and B) to describe the grave and the netherworld (Isaiah 14:11; Job 21:26; Job 17:14). Later material couples the worm with fire, as an image of the netherworld, which has by now become "hell." See Isaiah 66:24; Ecclesiasticus 7:17; Judith 16:17 and the New Testament.

[RSV "snail" (sablîl) at Psalm 58:9 cannot be maintained. The word means "miscarriage" as conclusively demonstrated by G. R. Driver, "Studies in the Vocabulary of the Old Testament V," JTS 34 (1933), 40-42.]

With the SCORPION we meet a specific motif in the use of animal imagery. The O.T. writers when describing certain types of terrain or certain territories will associate with them representative animals that underscore their nature. So of the desert:

...in the large and fearful dessert (with its) fiery serpents and scorpions (Deuteronomy 8:15).

A similar description occurs in Akkadian literature, where Esarhaddon speaks of going "in the desert where the terrain teems with snakes and scorpions as if with ants."³⁵

The passage in Ezekiel:

though briars and thorns are with you,
and you sit upon scorpions (Ezekiel 2:6)

is without parallel and thoroughly obscure. None of the comments offered by commentators seem particularly elucidating.³⁶

Other passages (I Kings 12:11, 14; II Chronicles 10: 11, 14) utilize a transferred meaning of scorpion as a metal hook in the tongue of a whip; hence a certain type of whip. This meaning is also attested in Akkadian. The usage was known to the ancient Bible translators. A representation of such a scourge on a cylinder seal is discussed by R. Zehnpfund, "Zuqaqīpu, das Schröpfinstrument der Babylonier," Beiträge zur Assyriologie und Semitischen Sprachwissenschaft, Band 4 (Leipzig, 1902), 220-226.

A schemer is said to "weave a SPIDER's web" (Isaiah 59:5) of intrigue. Elsewhere the spider's thread is used to picture a fragile and transitory object.

His confidence is a gossamer thread³⁷
His trust a spider's residence.
He leans against his house, but it does not stand.
He lays hold of it, but it does not endure
(Job 8:14).

It is possible that 'akkābīš, spider, should be read for 'akšūb (Horned viper?) in Psalm 140:4. However, the context suits very well the naming of another serpent:

They make their tongues sharp as a serpent's
and under their lips is the poison of
vipers.

The saying concerning the LEECH: "The Leech has two daughters; 'Give,' and 'Give!'" (Proverbs 30:15a) has provoked a great deal of study, without stimulating any agreement on a solution. The saying itself does not present any textual difficulty.³⁸ The chief problem of the verse is its connection with the following verses.³⁹ It should now be clear, after several thorough studies of the patterns of numerical sayings in the Old Testament and in Ugaritic literature, that a sequence of "two -- three -- four" falls outside of any known pattern.⁴⁰ Consequently we must regard verse 15a as an independent unit and not an integral part of what follows. Its placement before 15b-16 was no doubt inspired by the similar theme of the sayings, namely, "things which are insatiable."

We should comment further on the suggestion of H. Schneider that the "two daughters" of the leech are its two suckers, of which only one actually sucks blood, the other being used to cling onto the victim.⁴¹ This type of anatomical observation is too minute to find its way into a popular saying, and would surely be lost on almost all of those hearing or reading the saying. Animal imagery is generally limited to the readily observable features of the object of the metaphor. It

seems quite adequate to see in the leech's "daughters" an expression for consistency of action through generations. (Compare the maxims, "Like mother . . . like daughter [Ezek. 16:44] ;" or "Once an X, always an X.")

Finally, there is the opinion that the mention of Aluqah should be understood as a reference to an evil blood-sucking demon, known as 'Alûq/ 'Aulaq among the Arabs.⁴² This supposition, especially in the absence of any reference to the daughters of 'Alûq, does not seem to elucidate the passage. As J. J. Glück remarks, "The part this spirit supposedly played in later Jewish Demonology does not seem to manifest itself in literature."⁴³ 'Alûqâh as an animal fits well with the predominantly naturalistic/zoological observations of the second half of Proverbs 30. While it is easy to see how a leech could share its name with a blood-sucking ghoul, I see no compulsion to find a demonic reference in our passage from Proverbs.

Notes to Section A

¹

S. E. Loewenstamm, "The Number of Plagues in Psalm 105," Biblica 52 (1971), pp. 34-38.

²

As in verse 34 'arbeh // yeleg refers to the same plague of locusts (and in Psalm 78:46 hāsil // 'arbeh). In Psalm 78:45 flies ('äröb) and frogs (ṣəpərdē'a') likewise seem to be two typical representatives of the "pestiferous animal" plague.

³

Loewenstamm, p. 37.

⁴

See J. Bright, Jeremiah, Anchor Bible 21 (Garden City, 1965), p. 356 for an alternate rendering, "If you were filled with men as with locusts."

⁶

M. Streck, Die Inschriften Assurbanipals, Vorderasiatische Bibliothek 7/2 (Leipzig, 1916), p. 57, ll. 92-95. Streck, p. 57, note 6, remarks that the use of locusts for illustrating large numbers is common to Akkadian, Hebrew and Arabic "Bildersprache," and re-

fers to a study of K. Tallqvist in Hakedem I (1907), p. 10, not available to me.

For further examples from Akkadian literature, see R. Borger, Die Inschriften Asarhaddons Königs von Assyrien, Beiheft AfO no. 9 (Graz, 1956), p. 105. D. D. Luckenbill, The Annals of Senacherib, OIP 2 (Chicago, 1929), p. 43, ll. 56-7; p. 75, 1.93.

⁷ W. Heimpel, Tierbilder in der Sumerischen Literatur, Studia Pohl 2 (Rome, 1968).

⁸ The text of the passage reads as follows:

thth. kkdrt. r'i [š]
clh. k'irbym kp. k.qsm
ÿrmn. kp. mhr. 'tkt
r'išt. lbumth. šnst
kpt. bħbšh

The translation is that of M. Pope in "A Review of John Gray, The Legacy of Canaan (2nd ed.)," JSS 11 (1966), p. 236. See also F. I. Andersen, "The Diet of John the Baptist," Abr-Nahrain 3 (1961-62), p. 69. For representations of the goddess Kali bedecked in this gory manner see those given in H. Zimmer, Myths and Symbols in Indian Art and Civilization, ed. Joseph Campbell (Reprint; New York, 1962) plates 67 and 69.

9

Compare the Esarhaddon Treaty, ll. 599ff.
 (ANET, Suppl., 540a): "May they (the gods) let
 lice, caterpillars, and other field pests eat up your
 land and your district as if locusts."

10

Reading šäläl k^emô for šelalkem and gôbîm for
gēbîm with BH³.

11

The sudden disappearance of a swarm, though
 for a different reason, is utilized in a Sumerian simile
 listed by Heimpel, Tierbilder, p. 450, no. 78.8, when
 Lugalbanda is forsaken by his friends and relatives as
 "locusts leave a devastated (?) area."

12

D. R. Jones, Isaiah 56-66 and Joel, Torch
 Bible Commentary (London, 1964), p. 143. See the simi-
 lar remarks of A. Weiser, Das Buch der zwölf Kleinen
 Propheten, I, Das Alte Testament Deutsch, 24 (4th
 edition; 1963), p. 109. On the history of interpre-
 tation of the book, in addition to the commentaries,
 see J. A. Thompson, "Joel's Locusts in the Light of
 Near Eastern Parallels," JNES 14 (1955), 52-55. Still
 one of the best commentaries is that of S. R. Driver,
Joel and Amos, The Cambridge Bible for Schools and

Colleges (Cambridge, 1897); see especially his "Excursus on Locusts," pp. 82-91.

13

On the translation of ḥōsēs see R. B. Y. Scott, Proverbs, Anchor Bible 18 (Garden City, 1965), p. 180. Also D. W. Thomas, "Notes on Some Passages in the Book of Proverbs." VT 15 (1965), 276.

14

H. L. Ginsberg, et al., eds., The Five Megilloth and Jonah (Jewish Publication Society; Philadelphia, 1969), p. 77.

15

Presumably, the note (loc. cit.) has hasab. See Jastrow's Dictionary, p. 494a.

16

For mōgēn, "begger," see W. F. Albright, "Some Canaanite-Phoenician Sources of Hebrew Wisdom," Wisdom in Israel and in the Ancient Near East, SVT III, ed. M. Noth and D. W. Thomas (Leiden, 1955), p. 10.

17

On the second half of the verse, best taken as antithetical to the first half, see O. Becker, ZAW 70 (1958), 174, and G. R. Driver, "Mistranslations in the Old Testament," WdO 1 (1947), 30. There is no need to emend MT in deference to LXX. On the meaning of

the passage, Kraus, Psalmen, II (2nd edition; Neukirchen, 1961), p. 801.

It will not do to conclude on the basis of this verse that sbb means "to swarm", as does L. Armbruster, ZAW 50 (1932), 170, since the word is used of bulls and dogs in Psalm 22.

18

This passage has often been cited (wrongly, I believe) as reflecting a near blasphemous attitude. Lambert, BWL, p. 140, speaks of it as "scarcely reverent." If, however, the point of comparison is only in terms of number, no impiety is evidenced.

Atrahasis III.v.35 is restored with the aid of the Gilgamesh passage and presumably was identical to it. Atrahasis III.v.46 - vi.4 contains an episode relating to flies which corresponds to Gilgamesh XI, 162-65. Lambert and Millard (Atrahasis, [Oxford, 1969], "Philological Notes," p. 163f.) see it as an aetiological passage explaining the necklace on a status of the goddess Bēlet-ilī.

Atrahasis III.iii.44 is more difficult: elēnuia kíma zubbi iwû lillidu. Lambert and Millard translate: "My offspring -- cut off from me -- have become like flies!" Does this also refer to number of the dead? This would suit also III.iv.6 - "They have filled the river like dragon flies" (kíma kulili).

19

A similar comparison is found in LXX at Proverbs 25:20. A proposed reconstruction of the Hebrew is given by G. R. Driver, "Problems and Solutions," VT 4 (1954), p. 241.

20

Read rōqeb with BH³. See Fohrer, Hiob, p. 239.

21

Reading hemdô with KB³ for MT hamûdô.

22

A. Heidel, The Gilgamesh Epic and Old Testament Parallels (2nd ed.; Chicago, 1949), p. 99. ANET, 99. For the text, see R. C. Thompson, The Epic of Gilgamesh (Oxford, 1930). On kalmatu see also the qml of the Sefire Steles, cited below.

23

J. A. Fitzmeyer, The Aramaic Inscriptions of Sefire, Biblica et Orientalia 19 (Rome, 1967), pp. 15-16.

24

Ibid., p. 48f.

25

"La lecture du second h est certaine"
A. Dupont-Sommer, "Les inscriptions araméens de Sfire (Steles I et II)," MPAIBL 15 (1960), p. 242.

26

For a further instance of the rather rare mention of the "mouth" of an animal, see the unpublished text cited in CAD s.v. erbu: erebū ša pišunu a [kilu] hamaširū ša pišunu a [kilu]; "locusts whose mouth devours, mice whose mouth devours."

27

The reading "ant" was suggested by the first editor of the text. See S. Ronzevalle, "Fragments d'inscriptions araméens des environs d'Alep," Mélanges de l'Université Saint-Joseph, XV (1930-31), p. 244. See also the note of F. Rosenthal in ANET-Suppl., p. 660, n.6.

28

Support for this interpretation may be enlisted from the similar imagery of Gilgamesh X.vi.26-32:

Do we build a house for ever?

Do we seal (contracts) for ever?

Do brothers divide shares for ever?

Does hatred persist for ever in [the land]?

Does the river for ever raise up (and) bring
on floods?

The dragon-fly [leaves] (its) shell

That its face might (but) glance at the
face of the sun.

Since the days of yore there has been no
[permanence].

The translation is that of Speiser, ANET, 92b.

²⁹ Or yiddakkē'ū (Hithpa'el, with KB³). dk' "to beat, to crush" may have the nuance "to drive away" here, which would fit better with the following millipnē.

³⁰ This solution to the verse is essentially that of N. Herz, "Some Difficult Passages in Job," ZAW 20 (1900), 160-63, but with some modifications. For another attempt at solution see now A. C. M. Blommerde, Northwest Semitic Grammar and Job, Biblica et Orientalia 22 (Rome, 1969), pp. 40-43. Blommerde's treatment, in this writer's opinion, suffers by ignoring both metrical considerations and parallelism of structure.

³¹ For the asyndetic verbal construction, see the remarks of H. W. Hertzberg, Der Prediger, KAT XVII 4-5 (Gütersloh, 1963), p. 183.

³² Ibid., p. 187f.

³³ On this stylistic device, see E. Z. Melamed, "Break-Up of Stereotype Phrases as an Artistic Device in Biblical Poetry," Scripta Hierosolymitana, VIII (1961), p. 127.

34

Reading rimmat for MT mētē. G. R. Driver, "Linguistic and Textual Problems in Is. 40-66," JTS 36 (1935), p. 399, suggests that the mētē here may reflect an Akkadian word mutu, "lice, vermin" which was thought to occur in the lexical lists (see B. Landsberger, Die Fauna des Alten Mesopotamiens, Abhandlungen der Sächsischen Akademie der Wissenschaft, Phil.-hist. Klasse, XLII, 6 [Leipzig, 1934], pp. 20-23, 126.) For another supposed occurrence, see D. J. Wiseman, "The Vassal Treaties of Esarhaddon," Iraq 20 (1958), l. 599; ANET-Suppl., p. 540. In both texts, however, kalmutu, Neo-Assyrian form of kalmatu, the regular Akkadian word for louse, is to be read. See MSL VIII/2, p. 28, l. 253a, and see AHw s. v. kalmatu.

35

Borger, Esarhaddon, p. 56, iv, 56. Also ibid., 57, B iii 29.

36

See G. R. Driver, "Ezekiel ii.6; 'Sitting upon scorpions,'" JTS 35 (1934), 54-55, followed by NEB.

37

Reading qiššurē qayt with KB² et al. See the discussion in Fohrer, Hiob, p. 185. 11QPs^a reads 'kbyš, "spider." J. A. Sanders, The Psalms Scroll of

Qumran Cave 11, DJD IV (Oxford, 1965), Col. XXVII,
line 14 (Plate XVI). For an evaluation of this reading,
see Dahood, Psalms, III, p. 302.

38

The LXX rendering agapēsei attests the material reading of MT hab, but understands it as from 'āhēb rather than yāhab.

39

The placement before 15b is what has prompted the LXX "three" rather than MT "two," in 15a.

40

See the studies of G. Sauer, Die Sprüche Agurs, BWANT 84 (Stuttgart, 1963), and W. M. W. Roth, Numerical Sayings in the Old Testament, SVT XIII, (Leiden, 1965), where extensive bibliography is given and a history of interpretation which we do not reproduce here. Sauer, op. cit., p. 105, speaks of "ein klarer Aufbau" for vv. 15-16, although the rest of his study obviates this view, a fact noted by Roth, op. cit., p. 28, n.3.

41

H. Schneider, "Die 'Töchter' des Blutegels in Spr 30.15," Lux tua veritas, Festschrift H. Junker, ed. H. Gross and F. Mussner (Trier, 1961), 257-64.

42

So J. Wellhausen, Reste Arabischen Heidentums (2nd ed.; Berlin, 1897), p. 149, without elaboration, but taken up by W. O. E. Oesterley and T. H. Robinson, Hebrew Religion: Its Origin and Development (2nd ed.; New York, 1937), p. 118.

43

J. J. Glück, "Proverbs XXX 15a," VT 14 (1964), p. 367, n. 2. See also the rejoinder to Glück's article by F. S. North, "The Four Insatiabes," VT 15 (1965), 281-2. North cites the apt translation of Moffat's version: The leech has daughters twain/"Give, give," is their refrain.

B. Serpents

With SERPENTS in the Old Testament we are dealing with two bodies of material; the mythological and the naturalistic. Though there are questionable instances, in general these categories are readily distinguished. The mythological material is not included in our study.¹

In the broadest terms, serpents are classed with insects as things which crawl and slither on the ground (Micah 7:17; Deut. 32:24). The generic term for snakes is nāhāš. It occurs in first position without exception and terms used in parallelism to it may be understood as names of species,² even though for the most part they cannot be identified with any confidence.

Dan shall be a nāhāš on the way,

A še'pīpōn upon the road (Genesis 49:17).³

Their venom is like the venom of a nāhāš
like (that of) a deaf peten that stops its ears
(Psalm 58:5).

Afterwards it bites like a nāhāš

and like a sip'ōnî it secretes poison⁴ (Prov. 23:32).

See also the phrase of Jeremiah 8:17: nēhāšîm sip'ōnîm,
"sip'ōnîm snakes."

Peten lies on the borderline between an actual and a mythological animal. The latter classification should be understood when it is parallel to the tannîn,

"dragon" (Ps. 91:13; Deut. 32:33). Elsewhere, it seems to function as a generic term for snakes (so Isaiah 11:8; Job 20:16, where it is parallel to sip'ônî and sep'eh, and Ps. 58:5, parallel to nâhâš).⁵

Imagery involving snakes is quite uniform in its intent. Snakes serve to underline the hostility

A] of a particular environment: Deut. 8:15 and Isaiah 30:6.

B] of people: Psalm 58:5; Psalm 140:4.⁷

Amos 5:19, Eccl. 10:8 and Proverbs 23:32 (with BH³ and LXX) instruct us that it is the serpent's nature to bite, and he will eventually do so. Thus, the snake serves well to illustrate the wicked man, whose fangs, tongue and venom will eventually show themselves (Job 20:14-16). So constant and pervading is the evil nature of the wicked that he is like the snake who cannot be charmed (Jer. 8:17; Psalm 58:5-6). The consistent emergence of evil result from evil source is also the point of comparison in Isaiah 14:29:

For from the serpent's root there comes out
an adder (sepâc')
And its fruit is a flying sârâph.

Of this imagery Procksch remarks, "Das Bild . . . bezieht sich dann nicht auf das Verhältniss von Vater und Sohn . . . sondern . . . um eine sprichwörtlich Redensart, wonach die Schlangengeneration ein Bild immer mehr vergrösserten Unglücks ist."⁸

Though the reference here is to Assyria, there is no reason to call the serpent a "symbol" of Assyria.

Isaiah 59:5 follows the same line of thought:

They hatch out the eggs of a sip'ônî
They weave a spider's web.
One who eats of their eggs will die,
And an addled one⁹ hatches out an sep'eh.

Because the snake presents such a consistently hostile nature, the paradisaical picture of Isaiah 11:8 is all the more striking:

The suckling will play over the hole of the peten.
And over the den¹⁰ of a sip'ônî a weaned child
will stretch out his hand.

The close proximity of the snake to the ground serves to point out a position of groveling subservience (Micah 7:17 and Isaiah 65:25).¹¹

Two additional passages might be mentioned here. Proverbs 30:19 ostensibly refers to the intriguing manner of mobility of the serpent. Jeremiah 46:22 is completely obscure and very probably corrupt. Note the comment of Rudolph, (Jeremiah, HAT, 1. Reihe, No. 12 [Tübingen, 1958], p.250) "das Bild der Schlange trotz aller Versuche schwer erklärlich."

Notes to Section B

¹

A convenient categorization of the various passages involved is given by P. Humbert, "A propos du 'serpent' (bšn) du mythe de Môt et Aleïn," AfO 11 (1936), 235-7.

²

Noted also by Procksch, Jesaia I, KAT IX (Leipzig, 1930), p. 204, in regard to Is. 14:29: "For from the root of the nāħas will come out a sepa."

³

H.-J. Zobel, Stammesspruch und Geschichte, BZAW 95 (Berlin, 1965), pp. 88-97, sees in this verse reflections of historical events stretching back into the Amarna period. Dan is thus a clan of predators on those passing through its territory in chariots. Such conclusions are extremely difficult to make or criticize. At any rate, the other Biblical serpent imagery is of no aid in the interpretation of this verse.

⁴

Reading with LXX. See BH³.

⁵

nhš and bṭn are parallel terms also in Ugaritic. See the text from Ugaritica V (RS 24.244) and the treatment of M. C. Astour, "Two Ugaritic Serpent Charms," JNES 27 (1968), 13-36. Ugaritic similes involving ser-

pents are in broken contexts (CTCA 19:223; 17:VI:14) with the exception of 6:VI:19, yntkn kbtnm, "They bite like serpents," in the description of the battle between Baal and Mot.

6

See above under SCORPION (page 24) where Mesopotamian parallels are listed, and ANET, 292, col. ii, a text of Esarhaddon, which characterizes the desert as a place where snakes abound.

7

It is difficult to decide whether akšub in the verse is to indicate the name of a serpent, or should be taken as a corruption of akkabīš, "spider," i.e., another venomous animal. Isaiah 59:5 also presents spiders and snakes in parallel position. Psalm 10:7 presents a good commentary on what constitutes human "venom."

The Mesopotamian descriptions in similar language seem almost exclusively to refer not to people but to snake-demons and monstrous creatures. Two exceptions are the text in ANET, Suppl., p. 577, col. ii, where it is said of the king, "you spat venom like a snake" and, of an anonymous person, "like the snake, I became their enemy": A. Falkenstein and W. von Soden, Sumerische und Akkadische Hymnen und Gebete (Zurich, 1953), No. 65, p. 338.

For the other Akkadian material see Landsberger,
Fauna, p. 45ff. Sumerian examples are given by
Heimpel, Tierbilder, p. 464ff.

8

Procksch, Jesaja I, KAT IX (Leipzig, 1930),
p. 204.

9

Following the suggestion of P. Wernberg-Möller,
"A Note on zûr 'To Stink,'" VT 4 (1954), 322-25, who
connects hazzûrâh with Syriac madûrâtâ, which means
"bad eggs." The LXX ourion means an addled egg. See
further D. Weissert, "Der Basilisk und das Windei in
LXX - Jes 59₅," ZAW 79 (1967), 315-22.

10

The parallelism with hur pâten seems to demand
a meaning of "hole, den" for the second colon. It is
quite uncertain whether this requires an emendation of
the hapax m^eûrat. On the problems of the verse, see,
in addition to the commentaries of Procksch and Gray,
J. Reider, "Etymological Studies in Biblical Hebrew,"
VT 2 (1952), 115.

The wider context of this verse is discussed below,
p. 80f.

11

Inner-Biblical commentary on these verses is supplied by Psalm 18:45; Ps. 72:9; and Isaiah 49:23. A

similar picture seems to occur in Egyptian literature (Instruction of Amen-em-het) "crumbled to dust, a snake of the desert." ANET, 418b.

C. Birds

An examination of imagery involving birds brings to light the stylistic device of mentioning in adjacent *cola* a generic term for birds in the first instance, then the name of a specific bird in the second. Thus, instead of saying, "A path which the preying falcon cannot espy," we find:

A path which the bird of prey (*'ayit*) does
not know;
The eye of the falcon (*'ayyâh*) has not seen it
(Job 28:7).

Two additional examples concern the swallow:

Even a small bird (*sippôr*) finds a dwelling,
And a swallow (*dérôr*) has a nest (Psalm 84:4).

In prose, the sentence would read "A swallow-bird finds a nest to dwell in." The prose phrase "Like the flitting about of a swallow" is cast poetically as:

Like a small bird (*sippôr*) in its flitting,
Like a swallow (*dérôr*) in its flying
(Proverbs 30:2).

The generic term may come in the second instance:

The ravens of the wadi (*'ôrbê-nâhal*) will
pluck it out;
Carrion-birds (*bénê-nâšer*) will eat it
(Proverbs 30:17).

[Compare the parallelism in CTCA 18:IV:20f.,
nšrm // hbl d'iyim: "carrion-birds // bevy
of kites".]

The song-birds of Eccl. 12:4 (sippôr // bañôt-hassîr) are discussed below, page 59. By using the same stylistic pattern, the fluttering of a dove becomes:

They will flutter along like a small bird
(sippôr) from Egypt,
And like a dove (yônâh) from the land of Assyria (Hosea 11:11).

We believe that this analysis more adequately explains these passages than the proposal of G. R. Driver (VT 4 (1958), 233, and elsewhere) that sippôr, "small bird, passerine," when contrasted with other birds means "sparrow." The "duality" of these verses is due to the structure only, the semantic reference is only to one bird or group of birds in each case.

The Old Testament makes especially frequent reference to birds feeding upon the dead bodies of the slain. This picture no doubt has a varied background. The populace surely had frequent occasion to observe birds and beasts feeding on animal carcasses. The horror of being devoured by beasts and birds is mentioned among treaty-curses.¹ But it was undoubtedly simply a common curse (See I Kings 14:11; 16:4; 21:24).² If a more specific background is sought, the military sphere suggests itself (I Samuel 17:44, 46). The specific horror of this threat/curse is lack of burial, as is spelled out in various instances.

They gave the corpses of your servants
 as food to the birds of the heavens;
 The flesh of your pious ones
 to the beasts of the earth.
 They spilt blood like water
 all about Jerusalen --
 and there was none to bury (Psalm 79:2-3).

You (Pharaoh) shall fall upon the open field
 You shall not be gathered and not be reclaimed.³
 To the beasts of the earth and to the birds
 of the air I have given you as food (Ezekiel
 29:5; compare Ezek. 39:1-6).

They shall die of deadly diseases and they
 will be neither mourned nor buried; they shall
 be like dung on the open field. They shall
 perish by the sword and by famine, and their
 corpses shall be food for the birds of the
 air and the beasts of the earth (Jeremiah 16:4).

A military background for this imagery is all the more
 likely as it is the military operation which can occa-
 sion death in a foreign land, or, at any rate, away
 from the relatives who would look after proper burial
 (see II Samuel 21:10 and, for the importance attached
 to proper burial, Eccl. 6:3). Thus, the threat/curse
 of being devoured by birds and beasts is often coupled
 with the mention of death at the hands of the enemy
 (Deut. 28:25f.; Jer. 34:20; 19:7). This manner of
 death and its consequences are stated to be part of
 Yahweh's arsenal of punishment for the transgression of
 the covenant (Jer. 15:3).⁴

Stylistically, 'ôp haššāmaym coupled with hayyat
hā'âres is an inclusive phrase for all manner of predation.

tory animals, as is also, e.g., "the teeth of beasts and venom of crawling things" (Deut. 33:24). On occasion the term 'ayt (birds of prey in general) is used instead of 'ôp (Isaiah 18:6); that the meaning is the same is shown by the coupling with behēmat hā'âreg, and the phrase of Ezekiel 39:4 'êt sippôr kol-kânâp, "birds of prey of every sort" and the wild beasts of the steppe.

The literary motif of slain warriors being left unburied on the battlefield to be devoured by beasts and birds is also found in Assyrian inscriptions.

I [Esarhaddon] let vultures feed on the unburied corpses of their warriors.⁵

I [Assurbanipal] had dogs, swine, vultures, eagles (and) all kinds of birds and fish feed on their torn flesh.⁶

A curse in Esarhaddon's Vassal Treaty invokes the following:

May Ninurta . . . fill the steppe with your corpses, may he make your flesh food for the eagle and vulture.⁷

[In the Ugaritic legend of Aqhat (CTCA 19:I:32-33), we read: "Over the house of her father hover carrion-birds, There circles (ybsr) a bevy of kites." The observation of the circling birds leads the lady Pughat to conclude that her brother Dan'el has been killed.]

A passage which has evoked much discussion is Jeremiah 12:9, particularly the initial phrase ha'ayt sâbûa' nahâlâtî li, the famous "speckled bird of prey" of translations old and new alike, in spite of the fact that such a rendering yields little sense. It is G. R. Driver who has, in our opinion, shown the way to a solution of the problem by taking up the defense of the LXX rendering spêlaion 'ainâs and drawn attention to the Arabic gâiyitun "low-lying place," "hollow cavity, pit."⁸ The verse must then contain two homophones -- the first 'ayt meaning "lair," the second, the more frequently attested "bird of prey." sâbûa' should be read gâbôa', and the verse rendered:

My inheritance is the lair of hyenas,
The birds of prey are round about above her.

[The referent of nahâlâh here fluctuates between the land (v.9) and, ostensibly, the people (v. 8) -- a usage introduced by the Deuteronomic school. See G. von Rad, "The Promised Land and Yahweh's Land in the Hexateuch," in The Problem of the Hexateuch and Other Essays (New York, 1966), 79-93, and Ibid., Old Testament Theology I (New York, 1962), 224.]

Driver expatiates, "The land of Palestine, God's own possession, which, having taken up an attitude of hostility to Him, has been abandoned by Him and become as the hyaena's lair foul with the carcases of its victims, is hungrily watched by birds of prey hovering around it."⁹

Emerton¹⁰ still renders the verse as a question, which is quite unsuited to the context, which speaks of an accomplished fact. Hyatt¹¹ aptly captions the section (vv. 7-13) as "Yahweh's Lament over Israel's Desolation." The tenor is military ("I have given my beloved into the hand of her enemies", v. 7). Various historical occasions have been suggested, but the information which would allow one to pinpoint the historical context is lacking. (For discussion, see the commentaries).

Related to the foregoing is the image of the military foe descending on its enemy as the bird of prey swoops down upon its victim.

They (the enemy horsemen) fly like an eagle
swift to devour (Habakkuk 1:8).

The same **picture** lies behind Deut. 28:49; Isaiah 11:14; 46:11; Jeremiah 48:40; 49:22; Job 9:26; Hab. 1:8.

At Hosea 8:1 read:

•el-hikkəkā Šōpārekā
n̄šar ‘al-bêt yhwh

"(Set) your trumpet to your lips!
Announce from the temple of Yahweh."

This translation follows the suggestion of Tur-Sinai,¹² who called attention to Arabic naṣara, "to publish, announce," although he read kannaṣṣār "as a herald." The latter reading is accepted also by M. J. Buss, The Prophetic Word of Hosea, BZAW 111 (Berlin, 1969), p. 16 and note 33.

The swift flight of the eagle is utilized in simile: "swifter than eagles" (II Sam. 1:23; Jer. 4:13; Lam. 4:19).

Security -- real or imagined -- is shown by the high nest of the eagle:

You who dwell in the clefts of the rock,
who hold the heights of the hill --
Though you make your nest high like the eagle,
From there I will bring you down -- Oracle
of Yahweh (Jeremiah 49:16).

The same point is made in Obad. 4, and, in a brief discourse on the eagle itself, Job 39:27. This motive is frequent in Akkadian literature. Note particularly the following description from the annals of Assurnasirpal II:

The peak of the mountain rose like the point of an iron dagger, and no bird of heaven that flieth reacheth thereto. Like the nest of a vulture within the mountain was set their stronghold.¹³

Similarly Sargon II:

(a location) which since eternity no living being had penetrated and in which no wanderer had found a path, and over which no winged bird of the skies

had risen, or in which it had built a nest for its young to develop wings.¹⁴

In prophetic laments of Jeremiah (9:9; 12:4; 4:25 ?) and Hosea 4:3 the desolation of the land is marked by drought and the accompanying absence of birds and beasts. Viewed together with those passages which speak of wild and exotic beasts inhabiting the ruins (see below), I believe we should see in the former passages a reference to the lack of game (the apocalyptic note of Jer. 4:25 stands apart from the others in this respect.) This differentiation between game animals and wild beasts can best be seen in Jeremiah 9, where the prophet says in verse 9 "both the birds of the air and the beasts have fled and are gone," only to follow in verse 10 with the statement that Jerusalem will become a "lair of jackals."

Similar imagery occurs in the "Lamentation over the Destruction of Ur,"

Verily all my birds and winged creatures have flown away.¹⁵

Much of the imagery involving birds is limited to pointing out their freedom of action in flight (Psalm 55:7, 90:10; 124:7; Psalm 18:11 = II Sam. 22:11; cf. Ps. 104:3; Proverbs 6:5; 23:5;¹⁶ Hosea 9:11; Job 20:8) along with the ability to reach points of difficult access which birds possess, or the ability to cover

long distances and suddenly appear on the scene (Deut. 28:49; Psalm 11:1 -- reading with the versions nūdî har k^emô sippôr -- compare Jer. 48:28 and Song of Songs 2:14; Eccl. 10:20). Job 28:7 refers to the panoramic view presented to the high-flying bird, and does not necessarily imply anything about the quality of its eyesight, as is often suggested.

The largest groupings of various types of birds occur in the "Doom oracles against foreign nations" of the prophets Isaiah, Jeremiah and Zephaniah. The similarities between the different passages underline their conventional nature. A provisional translation is offered here.

Isaiah 34:10b-15 (Regarding Edom)

From generation to generation it shall lie waste,
 None shall traverse it for ever and ever.
 The owl (qâ'at) and porcupine (gippôd) shall possess it,
 The screech-owl (yanšôp) and raven shall dwell in it.
 He will stretch out over it the line of tôhû
 And the plummet of bôhû . . .
 They shall call it, "No Kingdom There";
 All its princes shall be nothing.
 Thorns shall grow over its strongholds
 Nettles and thistles in its fortresses.
 And it shall become a dwelling of jackals,
 An abode¹⁷ for ostriches.
 And siyim will meet iyim
 And the satyr (šê'ir) will meet his companion.
 Yes, there lilit will rest
 And find repose for herself.
 There shall the gippôz nest and lay eggs
 And the bâg'âh will brood in its shade.¹⁸
 Yea, there the hawks shall gather one with the other.

Isaiah 13:21-22 (Regarding Babylon)

And sīyîm will crouch there,
 Their houses will be full of ōhim
 (hyaenas?)
 Ostriches will dwell there,
 And satyrs shall cavort there.
ṣīyîm shall howl in its towers,
 And jackals in the pleasant palaces.

Jeremiah 50:39 (Concerning Babylon)

Therefore sīyîm will dwell with ṣīyîm
 And ostriches will dwell there.

Zephaniah 2:14 (Concerning Nineveh)

In her midst herds will crouch
 All the beasts of the field.
 Both owl (qâ'at) and porcupine (gippôd)
 Will lodge in her capitals.
 The (?) (qâl) will hoot in the window,
 The ḥore on the threshhold.¹⁹

There are problems of identification with most of the animals mentioned in these passages. Further, there is the question of how many and which ones are to be thought of as popularly conceived of as monsters and mythical beings rather than animals.²⁰ For our purposes it is enough to mark how the various passages give varied numbers out of a no doubt popularly standardized repertoire of exotic beasts associated with forsaken ruins. In the case of birds, it is owls of various sorts, carrion birds and ostriches which find their place in these descriptions. The conventionality of these groupings of beasts can be seen in the fact

that wherever an ostrich is mentioned in the OT, the jackal is listed in immediate connection (Isaiah 13:21; 34:13; 43:20; Micah 1:8; Job 30:29; Lam. 4:3 Qere), the only exception being Jer. 50:39, where a short snatch of poetry is used in a prose verse, the hearer/reader can complete the description for himself.

These vivid descriptions of deserted and devastated cities or countries find their parallels in the curses attached to treaties.²¹

The migratory habits of several birds are mentioned in the QT. Admiration (then as now) about how the birds recognize the times of migration became a vivid image for discerning the times.

Even the stork in the heavens
 knows her proper times;
A turtledove or a sîs cāgûr²²
 keeps the time of her coming.
But my people do not (even) recognize
 a divine judgment (lit: the mispat of
 Yahwah)
(Jeremiah 8:7).

In Job the migratory habits of the hawk (nêš) serve as an indication of the marvelous mystery which God has built into the universe.

Is it by your wisdom that the hawk soars
 and spreads his wings toward the south?
(Job 39:26).

The voices of migratory birds are noted in Song of Songs 2:12 as a sign of spring.

[Discerning the season by the observation
of migratory birds is mentioned in the Wen
Amun story. ANET, 28b.]

Certain similes seem to be taken from the practice of using dovecotes.

Who are these who fly like a cloud
and like doves to their windows?
(Isaiah 60:8).

The presence of šāb is somewhat strange here, although the testimony of the versions is unanimous. One might think of the appearance of a flock of white doves which while in flight resembles a small cloud. The mention of ships in the following verse has led Scott to the opinion that the image is actually one of the white sails on the vessels bearing exiles home by sea.²³ But with no explicit mention of color or, in this verse itself, of ships, it is much more reasonable to see a reference only to the freedom of movement of the birds and/or their swift flight. Hosea 11:11 may be interpreted similarly:

They shall flutter along like a bird from
Egypt
and like a dove from the land of Assyria.

The Sounds of Birds

Those passages which mention the sounds of birds in similes mostly refer to the sounds of distress and lament and are to be connected with the descriptions of exotic animals inhabiting ruins.

I am like an owl (*gā'at*) of the wilderness,
 I have become like an owl (*kōs*) that
 inhabits ruins.
 I stay awake and I moan²⁴
 Like a solitary bird on the roof²⁵
 (Psalm 102:7-8).

I will make a lament like the jackals
 And mourning like the ostriches
 (Micah 1:8).

I chirp like a *sīs āgūr*²⁶
 I moan like a dove
 (Isaiah 38:14).

I have become a brother to the jackals --
 A companion of ostriches²⁷
 (Job 30:29).

The moaning of doves is frequently mentioned (Nahum 2:8; Isaiah 59:11; Ezekiel 7:16.²⁸ Mesopotamian literature offers similar imagery.²⁹ From a Prayer of Lamentation to Istar we find:

My heart is flying; it keeps fluttering like
 a bird of heaven.
 I moan like a dove night and day
 (ANET, 324b, 11.63-4; BWL, p. 36).

Sumerian examples are given by Heimpel, Tierbilder,
 58.1, 3, 5, 8-10.

Many suggestions have been made in regard to
 Eccl. 12:4 (MT):

w̄yāqūm l̄eqd̄l h̄assippōr
w̄eyiššahū kol-b̄enöt h̄assir

The variety of proposed solutions can be conveniently reviewed in Gordis.³⁰ At the risk of simply adding to the number of conjectures, we offer here another possibility of interpretation, which makes sense of both *cola*, with only minor emendation. We would translate:

He rises before³¹ the sound of the birds,
 When all the songbirds are (yet) silent.

Since the context speaks of phenomena that accompany old age, most interpreters have seen in the verse a reference to loss of hearing acumen. An equally prominent feature among the habits of the elderly is insomnia and early rising.

A strikingly similar passage occurs in Akkadian literature:

ina Šērim lam iṣṣuru sabāri
mē ū iṣṣur p̄išu la ubla

"In the **morning** before the birds twitter,
 when the mouth of the bird has not yet taken up water."³²

Birds in Wisdom Sayings

Wisdom sayings incorporating bird imagery, like those involving insects discussed above, stand apart from the general tenor of bird imagery elsewhere. For instance, when a bird of prey is mentioned, neutral qualities are pointed to, such as the vast panorama available to the high-flying falcon (Job 28:7; compare 28:21); the admirable nature of the instinctive habits of the eagle (Job 39:26-30) as a witness to the providence of God in nature (see also Psalm 147:9; Job 38:41; Jer. 8:7); or the apparently effortless flight of the soaring eagle (Proverbs 30:19).³³ Proverbs 30:17, referring to the rapacity of carrion birds, is an exception.

The susceptibility of birds to being trapped is mentioned in various contexts (Prov. 7:23; Amos 3:5; Eccl. 9:12). These passages are balanced by references to birds escaping from or avoiding traps (Prov. 1:17; 6:5; Psalm 91:3; 124:7). The motive of the hunting of birds is prominent throughout the OT; see especially Lam. 3:52, Jeremiah 5:26-28 and Hosea 7:12.³⁴

Peculiar habits of certain birds are also noted -- Jeremiah 17:11;³⁵ Proverbs 31:31.³⁶ We also find the equivalent (if not, in the main part, the source) of the modern saying, "A little bird told me" (Eccl. 10:20),³⁷

In the wisdom literature it is asserted that by observing the ways of birds one can learn of the ways of wisdom (Job 35:11; see 12:7), but not wisdom itself which is so inaccessible that it is unknown to the birds who otherwise penetrate every remote place (Job 28:7, 21).

Exodus 19:4, "I bore you on eagles wings," seems to be a prose rendering of a simile in an earlier poetic celebration of the Exodus event, such as is found in the poem of Deuteronomy 32, verse 11:

Like an eagle that stirs up its nest,
That flutters over its young,
He spreads his wings and catches him,
Lifting him on his pinions.³⁸

In Mesopotamian literature, the imagery of being "taught to fly" serves as a picture of raising children.

Assur-etel-ilani reports: "there was no father who would rear me and put me on my wings." A text of Assurbanipal says, "I, whom no (human) father has reared, has taught to fly" Or, in a royal hymn to Istar: "like his own mother you (Ištar) have reared him (the king), cradling him in your arms [...] wings, (you) who have taught him to fly."³⁹

The picture of the adult bird busily protecting the young is used elsewhere as a simile of God's care for Israel (Isaiah 31:5; Psalm 17:8; 36:8; 57:2; 61:5; 63:8; 91:3).

To "renew your youth like the eagle" (Psalm 103:5) would seem to allude to the actions of the eagle whose gradual soaring circles have brought him close to earth, and who then returns to great height through the power of his wings to begin soaring once again. This action is described in Isaiah 40:31.⁴⁰

For the phrase nepoš tōrekā in Psalm 74:19 it is most difficult to accept a rendering "the soul of thy dove." The parallel hayyat ḥāniyēkā suggests some term referring to the piety of the individual (compare Psalm 79:2). The readings of the LXX exomologoumenēn soi, and the Syriac dēmaudyā lāk point to tōdekā, "one who acknowledges/praises you."⁴¹ M. Dahood has suggested a similar solution, without any consonantal change in the reading: tūrekā, "(those) taught by you," parsing the form as an "imperfect passive form of hiphil hōrah, 'to teach,' with the suffix being a dative expressing agency."⁴² Either solution is possible, with the weight of the versions, and the dubious nature of the existence of a 'dative expressing agency' throwing the likelihood to the first proposal. In any event, the reading "thy dove" is to be abandoned. The QT writers usually give a hint of the tertium, unless it is in a very obvious context. The absence of any clue here makes the reading suspect.

The helplessness of young birds is evoked in
Isaiah 16:2:

Like (aimlessly) wandering birds,
like scattered nestlings --
So are the daughters of Moab
at the fords of the Arnon.

A similar picture is found in Isaiah 10:14. Both of these passages may reflect a proverbial saying such as the one preserved in Akkadian:

My friend, catch the bird and where will the fledglings go!⁴³

A related proverb is found in Prov. 27:8, "Like a bird straying from her nest, so is a man who strays from his home."

Job 40:29 (English 41:5) makes reference to children playing with birds. The second colon reads differently in LXX (i.e., the addition of ōsper strouthion). This might be taken as indication that another bird name originally stood in the text here, but may also be a double reading, as the retroversion kayēnîm (see Lam. 4:3) closely resembles the word kenāanim of the following verse, and ostriches (yēnîm) are hardly to be played with, as their meanness is matched by their strength and hence they are quite dangerous. Another possibility is to construe the retroversion as kayyônah "like a dove." The dove would suit admirably as a play-thing.⁴⁴

Notes to Section C

¹

See the material collected by Hillers, Treaty Curses and the Old Testament Prophets, *Biblica et Orientalia* 16 (Rome, 1964), pp. 54-56.

²

So also in Mesopotamian literature. See the curse cited in the Maqlû series, "May eagles and vultures rage against your body." G. Meier, Die assyrische Beschwörungssammlung Maqlû, Beiheft AfO no. 2 (Berlin, 1937), p. 56, Col. VIII, 85, and compare Col. IV, 42ff.

³

BH² reads tiggābēr with Targum and some MSS. This reading may merely be interpretive. Burial is implied at any rate.

⁴

For the rendering of bāq'āh as the name of a bird, see the discussion of this passage by D. Leibel, "Bāq'āh - The Name of a Bird," Tarbiz 29 (1960), 191 [Hebrew]. For the Arabic bird baqi'a see Lane's Dictionary, I, 235.

19

G. R. Driver, "Studies in the Vocabulary of the Old Testament, I," JTS 31 (1930), p. 278f., relates

ḥōreb to the Akkadian harbu, which occurs in lists of birds, but has not been more closely identified. See CAD s.v. More recently, see Driver's remarks in PEQ 87 (1955), 137.

20

On these passages see especially G. R. Driver, "Birds in the Old Testament, II," PEQ 87 (1955), pp. 134-37; Ibid. "Lilith," PEQ 91 (1959), 55-58. Note that J. Bright, Jeremiah, Anchor Bible 21 (Garden City, 1965), p. 355, translates ṣiyim and ‘iyim as "goblins and ghouls," remarking that it is an effort to catch the alliteration of the original. On ṣiyim and ‘iyim see also G. R. Driver, art. "Jackal," in Hastings' Dictionary of the Bible, Revised edition edited by F. C. Grant and H. H. Rowley (New York, 1963), pp. 452-53.

The mythological nature of many of these beasts is stressed by C. C. Torrey, The Second Isaiah (New York, 1928), 289-95.

To the passages cited here, Isaiah 23:13 could be added, but the text is very uncertain. Cf. also Isaiah 14:23.

21

See the assemblage of material in D. R. Hillers, Treaty-Curses, pp. 44-56. On the passage cited from

Th. Bauer, Das Inschriftenwerk Assurbanipals, Assyriologische Bibliothek, Neue Folge 1 (Leipzig, 1933), p. 78 "In the street of the city the owl screeches," see now B. Landsberger, "Einige unerkannt gebliebene oder verkannte Nomina des Akkadischen," WdO 3 (1966), 262-268. Landsberger denies the meaning "owl" for qadû, preferring *Pterocles alchata* (sandgrouse). The point of the passage remains the same, however.

²² See BH³. Is this one bird or two? Isaiah 38:14 seems to favor one, but it is impossible to be sure. Identification is completely uncertain in any case. See Driver, PEQ 87 (1955), 131-32.

²³ R. B. Y. Scott, Isaiah, IB V (New York, 1956), p. 702. Paronomasia may have influenced the choice of terms here ('ab // 'ap). Torrey, The Second Isaiah, p. 448, calls attention to this.

²⁴ With BH³.

²⁵ The confusion in the textual tradition between bdd and ndd may have been influenced by Isaiah 16:2. The notes in BH³ regarding the versions are somewhat

confusing. Both Syriac and Targum have double renderings at this point.

For additional discussion, see the remarks of T. F. McDaniel, "Philological Studies in Lamentations. I," Biblica 49 (1968), pp. 38-41, and M. Dahood, Psalms, III, p. 13f.

There is also the possibility that sippôr bôdêd may be a compound name of a specific bird, as sippôr d'rôr in Prov. 26:2; Ps. 84:4. This is the suggestion of N. Airolidi, "Noti critiche ai salmi (Ps. 130, 1; 38, 5; 102, 8)." Augustinianum 10 (1970), 179-80.

Airolidi divides the verse as follows:

šaqadti wa'eheyéh kësippôr // {ke?} bôdêd 'al-gäg kol-hayyôm
"I lie awake and moan like a bird // like the bôdêd on
the roof, all day."

26

The suggestion of Scott (Isaiah, IB V, 376) to read sîs 'ôrég, "an unhappy swallow" does not comment itself in view of Jeremiah 8:7 (above, p. 56).

27

Pope, Job, p. 196: "The ostrich reportedly has considerable vocal versatility, including hissing, crackling, and a hideous, doleful moaning."

28

For the text see G. A. Cooke, The Book of Ezekiel, ICC V. 12 (New York, 1937) p. 81; W. Zimmerli,

Ezekiel, BKAT XIII, 3 (Neukirchen, 1956), 164.

29

F. Stummer, "Einige keilschriftliche Parallelen zu Jes 40-60," JBL 45 (1926), 186.

Also in Greek literature, the sound of the dove is construed as a complaint. H. Greeven, art. "peristera, trugōn," in TWNT mentions that (kata) trugona psallein means "to bewail one's misfortune." This article contains much other interesting material and extensive bibliography.

30

Gordis, Koheleth, 333f. See most recently the Jewish Publication Society's The Five Megilloth and Jonah, p. 76., "And the song of the bird grows feebler, And all the strains of music dying down." This rendering is that of editor Ginsberg: see his article, "Koheleth 12:4 in the Light of Ugaritic," Syria 33 (1956), 99-101.

31

Reading way^eqaddēm, "to do early, to precede," as in Aramaic and Syriac frequently. Compare, for Hebrew, Psalm 119:147; Jonah 4:2, and, for the confusion of qwm and qdm, I Sam. 20:25 and possibly Prov. 30:31. The construction qwm + l is examined by D. R. Hillers, "Ritual Procession of the Ark and Ps. 132," CBQ 30 (1968), p. 50.

32

S. Langdon, "Fragment of an Incantation Series,"
JRAS 1927, 538 r. II, lff. See CAD s.v. issuru.

33

This passage may lie behind the exposition of
 Wisdom of Solomon 5:9.

34

The mention of the "basketfull of birds" in
 Jer. 5:27 is none too clear, but apparently an attempt
 to extend the imagery of the preceding verse. Since
 the evil persons' rapacity is compared to the activity
 of fowlers (v.26), the result is that their houses are
 full of ill-gotten gains (lit. "deceit": cf. Bright,
Jeremiah, ad loc.) as the fowler's basket is full of
 the result of his activity.

The trapped bird is a common image for human dis-
 tress in Akkadian literature. From the Amarna letters
 see EA 74:45, "Like birds caught in a bird-net/gloss:
 trap/ so am I in Gubla." Similarly EA 78:13ff.,
 79:35ff., 81:34ff., 90:39ff. Further, the well-known
 passage from Sennacherib's account of the siege of
 Jerusalem: "Himself [Hezekiah] I made a prisoner in
 Jerusalem, his royal residence, like a bird in a cage,"
ANET, 288a. Often the image is more properly that of
 the fowler than the bird. See the material collected
 by Hillers, Treaty-Curses, pp. 69-70, with parallels
 from the inscriptions of Esarhaddon and the Era Epic.

35

See G. R. Driver, PEQ 87 (1955), 132-33.

36

The phrase "zarzir of loins" (fighting cock ?) remains obscure. See further J. A. Bewer, "Two Suggestions on Prov. 30₃₁ and Zech. 9₁₆," JBL 67 (1948), 61-2.

37

A similar saying is found in Ahiqar, line 98. A. Cowley, Aramaic Papyri of the Fifth Century BC (Oxford, 1923), p. 223.

38

The section Ex. 19:3b-9 is intrusive in the poem. Noth is certainly correct in labeling it "einen Zusatz deuteronomistischer Stils." M. Noth, Überlieferungsgeschichte des Pentateuch (Stuttgart, 1948), p. 33, n. 112.

39

These examples are cited from CAD s.v. sabābu.

40

See the commentaries. C. R. North, The Second Isaiah (Oxford, 1964), p. 91, notes the "soaring flight" as the point of comparison. See also Dahood, Psalms, III, p. 27.

41

Accepted by Kraus, Psalmen, I, p. 74.

42

M. Dahood, Psalms, II, p. 207.

43

T. Bauer, "Ein Viertes Altbabylonisches Fragment des Gilgames-Epos," JNES 16 (1957), 256, Vs. 14. Note how, Rd., line 2, the applicability of the proverb to the situation is spelled out: "Huwawa's milammu will be easy to find and capture." (Now given also in ANET-Suppl., 504b.) This and some similar phrases are listed in CAD s.v. atmu. See also the broken line from the Etana Legend (ANET, 116b, C-3): "my nest is destroyed . . . , my young are shattered (Sic! Read "scattered" saphu). For the text, S. Langdon, "The Legend of Etana and the Eagle, or the Epic Poem 'The city they hated,'" Babylonica XII (1931), p. 22, ll. 6-7.

See also ANET-Suppl., 650, ll. 218ff.:

May he moan like a dove in its hole,

May he thrash about like a swallow in its
cranny,

May he scurry about like a dove in terror.
(From The Curse of Agade).

44

This solution is adopted by many commentators. The attempts of D. W. Thomas, "Job XL, 29b: Text and Translation," VT 14 (1964), 114-116, to find in

lēna'arōtēkā the name of a bird (viz., nō'ar "sparrow" or the like) are not convincing, and do not adequately account for the reading of LXX or the present state of MT.

D. Predators

The imagery involving the DOG has received much attention in recent periodical literature.¹ It supplies one of the most commonly recognized conventional expressions of the ancient Near-Eastern epistolary style. It was common to designate oneself as a "dog" to indicate self-abasement in the presence of superiors. This practice is documented in Akkadian,² [Ugaritic],³ the Lachish Letters⁴ and Biblical Hebrew.

II Kings 8:13 is characteristic of the formula:

What is thy servant, the dog (mâh 'abdeka hakkeleb), that he should do this great thing?

See also I Samuel 17:43, "Am I a dog that you come against me with sticks" In addition to the phrase in question form, the expression keleb mêt, "dead dog" (I Sam. 24:15; II Sam. 9:8; 16:9) has its frequent Akkadian equivalent kalbu mitu.⁵ Quite probably, one should read 'abdeka ūkalbekā in II Samuel 7:21 and I Chronicles 17:19.⁶

The dog is also prominent in curses, mentioned along with other animals that feed on the bodies of the slain.

I will appoint over them four kinds of destroyers, says Yahweh, the sword to slay, the dogs to tear, and the birds of the air and the beasts of the earth to devour and destroy (Jeremiah 15:3).

With the verse from Jeremiah, compare the threat of Psalm 68:24, and the language of the petition in Psalm 22:21,⁷ and Hosea 13:8, "There the dogs (read: kelabim) shall eat them, the beasts of the steppe will tear them."

The following curse, in identical wording, occurs three times:

Those who die of the family of (Jereboam/Baasha/Ahab) in the city, the dogs shall eat, and those who die in the countryside the birds of the air shall eat. (I Kings 14:11; 16:4; 21:24).⁸

The working out of such a curse is a prominent motive of the Elijah-Jezebel legend (I Kings 21:19; 23; II Kings 9:10, 36; see I Kings 22:38).

Dogs, consequently, serve as a suitable image of one's enemies on the prowl (Psalm 22:17; 21; 59:7, 15). Their barking is mentioned (Psalm 59:7, 15; see Exodus 11:?) and the incongruity of a prophetic figure who says nothing in times of moral decay is underlined by comparison with a watchdog that is silent (Isaiah 56:10).

Three wisdom sayings concern the dog:

One who gets involved in a quarrel that is none of his business,
Is grabbing a mad dog by the tail.⁹
(Proverbs 26:17).

As a dog returns to his vomit,
A fool repeats his folly
(Proverbs 26:11).

The latter saying is attested both in the Old Testament and the New (II Peter 2:22).

Since the dog was such a despised and insignificant creature, it was suitable for the comparison (or, most likely, a quotation of a popular saying) by Ecclesiastes -- "A living dog is better off than a dead lion."

The JACKAL (tan; pl. tannim¹⁰) is noted as a typical denizen of the desert (Isaiah 35:7; 43:20; Malachi 1:3¹¹), but most frequently as being among the animals which haunt ruins. A typical verse of this sort is Jeremiah 9:10:

I shall render Jerusalem ruins (gallim¹²)
the lair of jackals (m̄'ôn tannim)
And the cities of Judah desolation,
without inhabitant.

Virtually identical are Jer. 10:22; 49:33; 51:37; and the same picture is presented in Isaiah 13:22; 34:13. The background of these passages has been discussed by Hillers in connection with treaty-curses.¹² The jackal's characteristic pant is mentioned in Jer. 14:6, and its cry in Micah 1:8. The similarity of Job 30:29 to the verse from Micah suggests that it is the wail of the jackal that is there intended.

The š̄ēl, "jackal," or "FOX," likewise is said to haunt ruins (Lam. 5:18) and serves as a vivid image of the prophets who do not promote the rebuilding of

the land, but are content to prowl in the rubble
(Ezekiel 13:4).¹³

"Ruins haunted by foxes" is a literary convention of long standing. An excellent example from Near-Eastern literature comes from the Sumerian, The Curse of Agade (ANET, Suppl., 651a):

May the evil ones, the ghosts of 'silent places' howl (there) evermore;
Over your usga-place established for illustrations,
May the 'fox of the ruined mounds,' glide (his) tail;
In your great gates (firmly) established in the land,
May the 'ukuku-birds of anguished heart' set up (his) nest

Psalm 63:11, "Let them be the portion of šu‘ālim," makes an identification with "jackals" certain, as foxes do not eat carrion. The reference is, of course, to the devouring of dead bodies by wild beasts, mentioned, with parallels, above, p. 47ff.

Hebrew zə’ēb is the WOLF. Its characterization as a denizen of the steppes (zə’ēb ḥārābōt, Jeremiah 5:6) should be recognized as constant (Jer. 5:6; Zephaniah 3:3; Habb. 1:8).¹⁴ Its character as a predator is stressed: one which tears (Gen. 49:27; Zeph. 3:3; Ezek. 22:27,¹⁵ Jer. 5:6). It is also said to be swift.¹⁶ It is often paired with another ferocious beast, the lion (Zeph. 3:3; Jer. 5:6).¹⁷

These characteristics of the wolf must supply the background of its suitability for depicting the nature of the tribe of Benjamin (Gen. 49:27): "Benjamin is a ravenous wolf; From the morning he devours prey (?), and till evening divides spoil."¹⁸ Zobel, citing Delitzsch, sees in the latter phrase the praise of "(der) Mut und die Tapferkeit des ständig nach kriegerischen Auseinandersetzungen begierigen Benjamin und seine sich in überreicher Kriegsbeute ausdrückenden Erfolge."¹⁹ It is hazardous to attempt to go beyond a general statement of this type.

The wolf also figures in the paradisaical description of the messianic age (Isaiah 11:6-9).

Then the wolf will dwell with the lamb,
and the leopard will stretch out
alongside the kid.
A calf and a lion and a fattling together,
and a young boy will lead them.
The cow and the bear will pasture --
together their young will stretch out.
[The lion will eat straw like an ox]²⁰
The suckling will play over the hold of the asp,
and over the den of a viper a weaned
child will stretch out his hand.

Trito-Isaiah utilized the same motive, Isaiah 66:25:

The wolf and the lamb will feed together;
The lion will eat straw like an ox.
Dust will be the serpent's food.
They will not hurt or destroy in all my
holy mountain.

The motive of wild animals living at peace with domestic animals is known in Sumerian literature as a

condition of the primeval paradise in two variant forms. One such picture is contained in the myth of Enki and Ninhursag, where it is part of the description of the land of Dilmun:

- 13 In Dilmun the raven utters no cries,
The ittidu-bird utters not the cry of
the ittidu-bird,
- 15 The lion kills not,
The wolf snatches not the lamb,
Unknown is the kid-devouring wild dog,
Unknown is the grain-devouring ...,
[Unknown] is the ... widow,
- 20 The bird on high ...s not its
The dove droops not the head²¹

While this text seems to imply the existence of the animals mentioned, yet without their predatory characteristics, the second text, from the epic of Enmerkar and the Lord of Aratta, speaks of a time when the animals mentioned did not exist:

- 136 Once upon a time there was no snake,
there was no scorpion,
There was no hyena, there was no lion.
There was no wild dog, no wolf,
There was no fear, no terror,
- 140 Man had no rival.²²

Among Isaiah's list of characteristic predators, the BEAR is included. The bear, with the wolf, lion and leopard elsewhere too serves as a paradigm of peril, particularly in wisdom sayings:

Better that a she-bear robbed of her cubs confront a man -- than a fool in his folly (Proverbs 17:12).

(Like) a growling lion or a charging bear is a wicked ruler over a poor people (Proverbs 28:15).

As if one were to run from a lion
...and a bear confronted him (Amos 5:19).

The proverbial character of the reference to the fury of the she-bear deprived of her cubs is evidenced by the fossilized phrase kēdōh ḥakkūl (Prov. 17:12; II Sam. 17:8; Hosea 13:7-8).²³

The bear and the lion are parallel in Lam 3:10-12. Isaiah 59:11 mentions the growl of the bear.

The LEOPARD (nāmēr), mentioned six times in the OT, figures in a number of different images. Attention is drawn to its ferocity²⁴ (Jer. 5:6; Hosea 13:7, and, by implication, Isaiah 11:6); its speed ("faster than leopards," Hab. 1:8); and its beautiful pelt (Jer. 13:23). The latter verse belongs to the genre of wisdom sayings by its form, which is that of rhetorical question.²⁵

Can the Cushite change (the color of) his skin?
Or the leopard (change) his spots?
(Jeremiah 13:23).

The threatening tenor of Jer. 5:6 and Hosea 13:7-8²⁶ has been related by Hillers to treaty curses.²⁷ A specific parallel from the treaties is supplied by Sefire II, A, 9.

Only two passages in the OT utilize the imagery of the pig, or BOAR.

The boar from the scrub (haṣir miyya'ar)
ravaged it,
Pestiferous insects (?) (z̄az) of the field
fed on it
(Psalm 80:14).

The context is a reference to the devastation of Israel by her enemies; the country itself is presented as a vine (for vineyard).

Like a gold ring in a swine's snout
Is a beautiful woman without good sense
(Prov. 11:22).

The ultimate in incongruity is expressed here by the juxtaposition of jewelry and swine. The same comparison is used in the N.T. (Matt. 7:6).²⁸

The HYRAX or CONEY (sāpān), whose propensity for rocky areas is correctly noted in Psalm 104:18, is also cited in Prov. 30:26. Here also this choice of living quarters is mentioned as a good principle for the weak and small to follow:

The conies are a feeble lot,
But they establish their homes in the rock
(Prov. 30:26).

For the Old Testament writers the LION was the most menacing of wild beasts, and the most frequent image of the hostility of men. Prominent among passages involving the imagery of the lion is mention of its roar. **Thus the rhetorical question of Amos:**

Does a lion roar in/from the scrub,
if he has no prey?
Does a young lion give forth his growl
[from his lair]²⁹
unless he has caught something?
(Amos 3:4).

We may make notice here of the parallelism of a word for the adult of the species ('aryāh) and its young (k̄p̄ir) - as also in Isaiah 31:4, Micah 5:7 et al.,

and lābi' // kēpir below in Isaiah 5:29.

The growling of lions over their prey is noted also in Jeremiah 51:38 and Psalm 104:21. Man's inevitable fear at the roar of the lion serves as an admirable model for the same prophet in underscoring the divine motivation of prophesy:

A lion has roared: who is not terrified?
 The Lord Yahweh has spoken: who can but prophesy?
 (Amos 3:8).

The rhetorical maxim, as has often been remarked, is characteristic of wisdom sayings, and, in the case of the latter passage, an even closer relationship with wisdom literature may be indicated by the point of comparison, which is not "fear" but the inevitable cause and effect relationship. A similar point of comparison seems to be intended in Joel 4:16 and Hosea 11:10, but the latter verse is notoriously difficult. Elsewhere the roaring of lions serves to indicate the power of an enemy to inspire terror and signal his immanent degradations (Isaiah 5:29; Jer. 2:15; Ezek. 19:7; 22:25; Psalm 22:14). When the lion roars, one cannot assume friendly intentions.

My heritage has become to me
 like a lion in the scrub.
 She has let out her roar against me,
 therefore I hate her (Jeremiah 12:8).

A roar of displeasure is indicated also in Zech. 11:3.

Both the lion's growl and its dauntless bravery are mentioned in the extended image of Isaiah 31:4:

Just as the lion growls --
the young lion over its prey,
When (^{as}~~a~~ser) a band of shepherds
is called out against him;
And is not frightened by their noise,
nor daunted by their commotion,
Thus Yahweh of Hosts will come down
to wage war on Mt. Zion and on its hill.³⁰

Strength and bravery are combined in the military hero, and in the lion. It is difficult to separate the two ideas. Strength is commonly seen as the reference in the passage describing Saul and Jonathan:

they were swifter than eagles -- stronger
than lions (II Samuel 1:23);

but valor is the obvious reference in II Samuel 17:10:

. . . a valiant man whose heart is as the
heart of a lion . . . ,

and in Proverbs:

The lion (layiš) is the most valiant of
beasts,
And retreats before none (Proverbs 30:30).

An evil man flees when none pursues;
But the just are as confident as the lion
(Proverbs 28:1).

It is the lion's teeth that supply vivid imagery of one's enemies' attacks. Joel underscores the devastation of locusts by comparing their "teeth" to those of a lion (Joel 1:6).³¹ In Psalm 22:14 it is said of the Psalmist's enemies that

they open their mouths against me
(like) a ravening and roaring lion,
and again in verse 22, "save me from the mouth of the lion."³² Similar imagery is utilized in Amos 3:12; Jeremiah 2:30 and most probably Isaiah 38:13 and Jeremiah 50:17. So also Psalm 7:3, "lest he tear my throat like a lion, carrying me off with none to rescue." Psalm 57:5 is most graphic:

I lie in the midst of lions,
devourers of humans.
Their teeth are spear and arrows,
and their tongue a sharp sword.

The lion's teeth are again pictured in Ps. 58:7:

O God, crush his teeth in his mouth,
break the fangs of the young lions,
O Yahweh.³³

The combinations in Psalm 58 and 91:13 of the serpent and lion have led to the suggestion that a mythological creature, a "Mischwesen" of the two such as the griffin, may actually lie behind the poet's words.³⁴ This background may also be extended to Isaiah 30:6 and Job 10:16; 28:8.

[In Isaiah 15:9, "a lion for those of Moab who escape," (RSV), read, with Scott (Isaiah IB V, p. 269), arawwēh, "I will drench (with blood)" comparing Is. 16:9.

Deuteronomy 33:22 remains obscure because of the hapax yzng. Cross and Freedman, "The

Blessing of Moses," JBL 67 (1948), p. 208,
 n. 74 and page 195, translate "shies away
 from a viper" following a suggestion of
 W. F. Albright.]

Job 4:10-11 has remained a rather obscure passage:

The roar of the lion ('aryēh),
 the voice of the lion (sāḥal)
 The teeth of young lions (kēṭārīm) are broken.
 The lion (layiš) perishes for lack of prey,
 and the offspring of the lion (bēnē
lābi') are scattered.

In the context of the fourth chapter of Job, this must in some way support Eliphaz's contention that the principle of retribution ultimately works in all creation, and that misfortune is a reliable indicator of impiety. The strong man may be tempted to neglect acts of piety, but he will ultimately come to ruin. Eliphaz contends that the innocent do not perish (v.7) and that those who sow trouble reap the same (v. 8) -- the implication, of course, being that the reverse is also true: those who reap trouble do so because of what they sow. The choice of imagery is an attempt to draw an example for the argument from even the mightiest of creatures, the lion. Similar imagery is used to support the same contention in the Babylonian Theodicy:³⁵

The onager, the wild ass, who filled itself
 with ...
 Did it pay attention to the giver of assured
divine oracles?

The savage lion who devoured the choicest meat,
Did it bring its flour offering to appease the goddess's anger?

Come, consider the lion that you mentioned, the enemy of cattle.
For the crime which the lion committed, the pit awaits him.³⁶

The premier example of the lion as an image of the impious comes from the Kutha Legend of Naram Sin:

What lion observed oracles,
What wolf inquired of a woman dream interpreter?
I will go like a robber in the pleasure of my heart.³⁷

Frequent mention is made of Israel's enemy going out on the prowl like a lion. So, e.g.,

A lion has come up from his thicket,
a ravager of nations has set out
-- has gone out from his place
(Jeremiah 4:7).³⁸

It is, of course, enough to say that the lion has "set out," for it was also proverbial knowledge that the lion, once on the prowl, did not turn back without accomplishing his purpose (Proverbs 30:30 and Isaiah 31:4 see above). So Numbers 23:24:

Behold, a people that rises up like a lion,
Like a lion it rouses itself.
It does not repose until it devours prey
-- 'till it drinks the blood of the slain.

The same imagery is presented also in Jeremiah 25:38;39

Like a lion he has left his covert.
How their land has become a waste!

To the same classification belongs Jer. 49:19 (= 50:44).

hinnēh kə'aryēh ya'aleh migge'ōn

hayyariēn 'el nēwāh 'etān

kī 'argī'āh 'arīsēm mē'ālēhā

ūmibhar 'elehā 'eqdōd

Behold, like a lion which comes up
from the brushland of the Jordan
to the perennial pasturelands --
Surely, I will startle and scatter them
from her,
marking⁴⁰ her chosen princes

Psalm writers find an image of treachery in the
lion's habit of leaping on its prey from cover.

He lurks in secret, like a lion in his
covert⁴¹ (Psalm 10:9).

He is like a lion eager to pounce on prey,
like a young lion lurking in ambush
(Psalm 17:12).⁴²

See also Job 38:39-40 and Lam. 3:10. The lion for
the enemy in general is noted in Ps. 35:17, but not
in Ps. 34:11 and Ezek. 38:13, where kəpirīm is a by-
form of kabbirīm, "the rich," and so translated by
the versions.⁴³

Assyria's capital of Nineveh is likened to a
lion's den by Nahum, while its soldiers are compared
to lions:

Where (now) is the lion's den,
the cave⁴⁴ of the young lions,
Where the lion went, bringing in the cubs,
where there was none to disturb (them).
The lion tore prey for its whelps,

and strangled (prey) for his lioness.
 He filled his caves with prey,
 and his den with torn flesh
 (Nahum 2:12-13).

The passage is not without difficulty, particularly in the second bi-colon, which appears to be too long. Yet, if the initial 'ašer is considered extra-metrical, we are left with a(4+4) line. Very possibly the construction 'aryēh lābî' is a doublet,⁴⁵ and we should read:

'ašer hālak ('aryēh/lābî') šam

gûr 'aryēh w^e'en mahārīd

To which the lion retreats,
 --the lion's young-- without disturbance.

The parallel structure of the verse and other usages indicate that the poet is referring to the adult and its young. This is due to the dictates of form. There is no need to see in one the leader of an army and the other as soldiers, or the like.⁴⁶

Several passages reflect the general destructiveness of the lion, particularly as the enemy of the flock (along with other ferocious beasts -- cf.

Jer. 5:6; Amos 5:19).

The remnant of Jacob will be among the nations
 In the midst of many peoples
 Like a lion among the beasts of the scrub.
 Like a young lion amid flocks of sheep,
 Which ('ašer), when he passes through, he
 tramples and seizes prey -- no rescue
 is possible (Micah 5:7).

For I will be like a lion (šahal) to Ephraim,
 Like a young lion (k̄ep̄er) to the house
 of Judah
 I myself will seize prey and pass on,
 I will carry off -- no rescue is possible
 (Hosea 5:14).

Destructiveness and ferocity is the point of comparison
 in Deut. 33:20:

(Gad) couches like a lion,
 He tears a limb -- the pate as well.

If there is a historic circumstance behind the saying,
 beyond the picture of general ferocity, it is described
 (verse 21) only in the most general terms.⁴⁷ Cross
 and Freedman are undoubtedly correct in supposing that
 something has been lost from the saying about Gad, and
 that there is no connection between verse 20a and
 20b-d.⁴⁸

Isaiah 30:6 is another of those passages which use
 animal imagery to characterize certain localities; in
 this instance it is the Negeb, of which it is said:

The lion (lābi') and leviš-lion are there⁴⁹
 The viper and flying zārāph.

The opposite is stressed in the (paradisaical) picture
 of the future road to Zion in Is. 35:9:

There will be no lion there,
 The ravenous beast shall not come up there.

Allied to these are the descriptions of the lion's be-
 nign behavior in Is. 11:7 and 65:25, where it is said
 that he is destined to "eat straw like cattle."

The lion is an apt comparison for the person of the king.

The anger of the king is like the roar of a lion:
But like dew upon grass is his favor
(Prov. 10:12).

The terror (inspired by) the king is like the roar of a lion:
He who (purposely) angers him is (deliberately) harming himself⁵⁰
(Prov. 20:2; see also Prov. 28:15).

As a symbol of royalty, the lion is utilized by Ezekiel in a lament (Ezek. 19:1-9). As Muilenburg notes "(Ezekiel's) imagery is clearly derived from the royal ideology of the Davidic house."⁵¹ The mother-lion is the tribe of Judah (Gen. 49:9;⁵² Num. 23:24; 24:9) with two sons (Jehoahaz and Jehoiachim) pictured as two young lions. It again occurs in Ezek. 32:2 in connection with the Egyptian royal house, but the import of the passage is not clear. Many commentators challenge the reading k^{ep̄ir} g^{oyim} nidm̄ta. The passages from Proverbs, like those of Amos (3:4 and 3:8 -- see above, p.8⁴²) stress the consistency of reaction to certain situations by both the "king of beasts" and the kings of men.

Another wisdom saying involving the lion, again in two variant forms, is Prov. 22:13 and 26:13:

The loafer says, "There is a lion (^ari)
outside,
a man-eater⁵² (erāsēah) on the streets"
(Prov. 22:13).

The loafer says, "There is a lion (šahal) on
the road,
a lion (ayî) in the streets"
(Prov. 26:13).

Notes to Section D

¹

D. W. Thomas, "Kelebh 'Dog': Its Origin and Some Usages of it in the Old Testament," VT 10 (1960), 410-27. G. W. Coats, "Self-Abasement and Insult Formulas," JBL 89 (1970), 14-26, is an excellent treatment.

²

For examples from the Amarna material see EA, Glossary, s.v. kalbu; also AHw 424b, sec. 5.

³

The chief text under consideration here is CTCA 16 (II Keret) I, 2, 15f.; II, 100. kklb. bbtk. n^ctq.// k'inxr p^ap. h^stk. The text is rendered quite differently, e.g., by H. L. Ginsberg, The Legend of King Keret, BASOR Supplementary Studies Nos. 2-3 (New Haven, 1946), p. 26ff. and p. 43f. The various suggestions for translation are catalogued by J. Gray, The KRT Text in the Literature of Ras Shamra (2nd ed.; Leiden, 1964) p. 63f. See most recently M. Dahood, "Ugaritic-Hebrew Syntax and Style," Ugarit-Forschungen 1 (1969), p. 28, and compare Ugaritica V, text number 1 [RS. 24,258] 11.12-13. The correct reading for the latter passage is given by D. R. Hillers, "Some Books Recently Received," BASOR 198 (1970), p. 46: hⁿ. lm. k^clb. t^cdbn // n^sb l^cinxr. t^cdbn. ktp.

⁴

Letter II, 3f.: V, 3f.: VI, 2f., and perhaps to be restored elsewhere. In view of the formulaic character of the phrase, the suggestion to read Klb as the proper name 'Caleb' in Lachish Letters II, V and VI (so A. Jepsen, "Drei Westsemitische Inschriften," MIO 15 (1969), 4-5) is not at all convincing.

⁵

See the list of D. W. Thomas, op. cit., p. 417, n. lff.

⁶

With Torczyner (Tur-Sinai), Lachish I: The Lachish Letters (Oxford, 1938), p. 39f. The phrase of II Sam. 3:8, ḥarōš keleb ḥānōki, is apparently of the same import, but in this case denying an insult. Thomas, op. cit., pp. 417-23 seeks to establish the meaning "baboon" for the phrase (Greek: kunocephalos): his solution is attractive, although no parallels from the semitic languages are cited. Thomas includes in his study a survey of attempts at the solution of the passage.

⁷

In view of Jer. 15:3, it is difficult to concur with Dahood (Psalms, II, p. 141) that "sword" and "dog" in Psalm 22:21 exhibit an "unexampled parallel."

F. C. Fensham, "The Dog in Exodus XI 7," VT 16 (1966), 504-7 sees the statement there ("against the people of Israel . . . not a dog shall growl") as the opposite of the curse of being eaten by dogs.

8

Similar phraseology is found in Akkadian. See Esarhaddon's Vassal Treaty, ll. 451-52 and 483-4 [ANET, Suppl., 538b, 539a.] Also Hillers, Treaty-Curses, p. 68f.

9

Reading znb "tail" with LXX [kerkou] for MT 'zny "ears."

10

There is occasional confusion between the plural tannîm and the singular tanîn, a name for the mythological sea-dragon. Read tanîn in Ezekiel 29:3 and 32:2, and very probably also in Psalm 44:20 (so, e.g., NEB). Compare Jeremiah 51:34 for similar imagery. In Lam. 4:3, I follow the reading of the Q^ere, tannîm, "jackals." For the contrary view, see G. R. Driver, "Mythical Monsters in the Old Testament," in Studi Orientalistici in onore di Giorgio Levi Della Vida, I (Rome, 1956), p. 246, n.6, and ibid., art. "Jackal" in Dictionary of the Bible (Revised edition edited by F. C. Grant and H. H. Rowley; New York, 1963), 452-3. The evidence of the Greek in all these passages is so

confused as to offer little help: i.e., Hebrew tan is rendered as siren, dragon, bird, ostrich, and lion. Driver aptly remarks that the names for jackal and fox in Hebrew and Arabic were apparently used indiscriminately, and notes that everything which is said of foxes (see below) also pertains to jackals, but that "jackal" alone suits all passages. Also pertinent is the discussion of B. Albrektson, Studies in the Text and Theology of the Book of Lamentations, Studia Theologica Lundensia 21 (Lund, 1963), pp. 174ff.

11

The reading of LXX, domata, is not to be preferred. Although nēwōt midbār is a frequent phrase in the O.T., the introduction of the phrase removes any threatening tone from the second colon of the verse. In support of MT cf. the phrase of Is. 34:13 nēwēh tannim.¹¹

12

Hillers, Treaty-Curses, pp. 44-54, esp. 53f.

13

For this imagery see, in addition to those cited above, p.78; Borger, Esarhaddon, p. 107, Para. 68, "the fox and the hyena made their lairs (in the devastated cities)"; Sefire I,A,32f. "And may Arpad become a mound to [house the desert animal]: the gazelle and the fox"

And from the Lamentation over the Destruction of Ur (Sumerian): "In the rivers of my city dust has been gathered, into fox-dens verily they have been made" (ANET, 460b).

The weakened and eroded walls of deserted cities were observed to collapse under the minimal weight of such a prowling beast, and hence a poorly constructed wall is ridiculed as being one that would collapse under the weight of a fox/jackal -- Nehemiah 3:35.

Zimmerli, Ezekiel, BKAT XIII (Neukirchen, 1958), p. 291 sees the latter passage as helping to explain "the little foxes that spoil the vineyards" (Song of Songs 2:15): the false prophets in Ezek. 13:4 are "gleich den bösen Füchsen im Weinberg, die sich in den eingrissenen Mauern tummeln und die Reben schädigen."

¹⁴

Convincingly shown by K. Elliger, "Das Ende der 'Abendwölfe,'" Festschrift A. Bertholet, ed. W. Baumgartner, et al. (Tübingen, 1950), 158-75. I cannot, however, agree with Elliger's proposed reading of Zeph. 3:3, in spite of his exhaustive examination of a host of proposals. Is the solution perhaps much nearer at hand? Read for l¹ grmw lbqr, l¹ū gāremū (or a Piel form) l¹ebaqār, "They do indeed gnaw (the bones of) the cattle." See also M. Stenzel,

"Zum Verständnis von Zeph III 3B," VT 1 (1951),
303-5.

15

On this passage see the remarks of D. H. Müller, "Der Prophet Ezekiel entlehnt eine Stelle des Propheten Zephanja und glossiert sie," WZKM 19 (1905), 263-70.

16

So the haddû of Hab. 1:8. See KB³, p. 280a and G. R. Driver, "Hebrew Notes," ZAW 52 (1934), p. 54. The parallelism of hdd and qlî occurs also in Ahiqar, line 38. The swiftness of the wolf is a frequent element in Sumerian literature. See the examples of Heimpel, Tierbilder, pp. 346f.

17

So also in Akkadian literature. See Gilgamesh XI, ll. 186ff. (ANET, 95a).

18

For the translation of babbōqer . . . lā'ereb as "from morning . . . till evening," a merism for "all day long," see M. Dahood, Ugaritic-Hebrew Philology, Biblica et Orientalia 17 (Rome, 1965), p. 27

19

H.-J. Zobel, Stammesspruch und Geschichte, p. 25.

20

Perhaps introduced from Is. 66:25.

21

The translation is that of S. N. Kramer, ANET, 38a, where further literature is given. See the translation of lines 19-20 given by Heimpel, Tierbilder, p. 417: "The malt which the widow has spread out on the roof, this malt the birds of the sky do not devour;" and of line 17 (Ibid., p. 354): "It does not come to mind to the pariah-dog to kill a kid."

22

S. N. Kramer, Enmerkar and the Lord of Aratta (Philadelphia, 1952), pp. 14-15. Ibid., "Man's Golden Age: A Sumerian Parallel to Gen. XI.1," JAOS 63 (1943), 191-94; Ibid., "The 'Babel of Tongues': A Sumerian Version," JAOS 88 (1968), 108-111. See also Heimpel, Tierbilder, p. 354, and Phoenix 15 (1969), 225ff.

23

Hillers, Treaty-Curses, p. 56 and n. 38, calls attention to the motif of the "lion bereft of cubs," which occurs in the Gilgamesh Epic (ANET, 88a). To this may be added also the passage from Iliad XVIII, 316. This is one of those motives cited by T. B. L. Webster, From Mycenae to Homer (New York, 1964), p. 82, in his discussion of the connections between Near-Eastern and early Mediterranean literatures.

24

See the Egyptian "The Story of Two Brothers,"
ANET, 24a: "Then the lad [became] like a leopard with
 [great] rage."

25

More precisely, the rhetorical question is a frequently used "sprüchwörtliche Redensart." In this case, it is also the content which suggests a wisdom classification (i.e., generalization based on experience). Jer. 12:23b cinches the case by supplying the precise reference of the general proverbial statement of 23a. A helpful study of forms of wisdom sayings both within and outside of the "Wisdom Literature" of the O.T. is given by H.-J. Hermissen, Studien zur Israelitischen Spruchweisheit, WMANT 28 (Neukirchen, 1968), passim and especially chapter three.

26

MT 'āśûr of Hosea 13:7 should be connected with Aramaic šewar, "to jump up, leap;" Arabic sâra, "to assault, assail." So I. Eitan, "Biblical Studies," HUCA 14 (1939), p. 5. Eitan makes note of the natural progression of the verbs in vv.7-8: "I will leap . . . confront . . . tear . . . devour."

27

Hillers, Treaty-Curses, pp. 55-6.

28

On other references to swine, esp. Isaiah 65:4; 66:3, 17, see R. DeVaux, "Les sacrifices de porcs en Palestine et dans l'Ancien Orient," Bible et Orient (Paris, 1967) 499-516, esp. 514ff. [= Von Ugarit nach Qumran: Festschrift für Otto Eissfeldt, BZAW 77 (Berlin, 1958), 250-65.]

Mice also are mentioned in Is. 66:17. No imagery, strictly speaking, is involved here, nor in I Sam. 6, passim.

29

The word mimme'ōnātō appears to be outside of the dominant meter of the section. H. W. Wolff retains it in the text, with some hesitation, remarking that the other sentences in the section vv. 3-6 all include a locative determination. H. W. Wolff, Amos' geistige Heimat, WMANT 18 (Neukirchen, 1964), p. 5, n.l.

30

This image is found also in Greek literature, as noted already by Lowth. Cf. Iliad XVIII, 161ff. and XII, 299ff.

31

On the forms metalle'ōt and malte'ōt, see M. Dahood, "The Etymology of Malta'ot (Ps. 58,7)," CBQ 17 (1955), 180-3.

32

On Psalm 22:17 and other problems of vv. 14 and 22, see the commentaries, esp. the discussions of Dahood and Kraus.

33

On the translation of the preposition b in bepîmô [Dahood renders, "rip out . . . from their mouths" Psalms, II, pp. 56 and 60], see the remarks of C. Brekelmans, "Some Considerations on the Translation of the Psalms by M. Dahood," Ugarit-Forschungen I (1969), p. 10.

34

See M. Pope, Job, Anchor Bible 15, p. 180, with reference to the suggestions of S. Mowinckel, "sahal," in Hebrew and Semitic Studies Presented to G. R. Driver (Oxford, 1963), 95-103.

35

For an introduction to this work and a translation, see Lambert, Babylonian Wisdom Literature, pp. 63-91.

36

Ibid., pp. 74-75. Also ANET, Suppl., 602.

37

O. Gurney, "The Cuthean Legend of Naram-Sin," Anatolian Studies 5 (1955), p. 102, ll. 80-83. Naram-Sin was remembered in literary texts as one who defied

the will of the gods. See the introduction and text of The Curse of Agade in ANET, Suppl., 646-651.

38

Jeremiah here has broken up between two colas the stereotyped phrase 'aryēh mašhît "ravaging lion"; cf. Jer. 2:30.

39

For the second half of the verse see the commentary of Bright, ad loc. (following BH³ and the versions). The New English Bible is certainly in error in referring v. 38a to the populace, rather than (properly) to Yahweh, mentioned explicitly in v. 36 as the author of the degradations upon the land.

40

NEB's "rounding up" is an apt rendering. For other problems of the text cf. BH³ and the commentaries.

41

The second bi-colon does not continue the imagery of the lion. See R. Gordis, "Psalm 9-10 -- A Textual and Exegetical Study," JQR 48 (1957), 16-17.

42

The suggestion to attach dimyôñô to the preceding colon (Dahood, Psalms I, ad loc.) is elaborated by N. J. Tromp, Primitive Conceptions of Death and the Netherworld in the Old Testament, Biblica et Orientalia

21 (Rome, 1969), p. 84f. This creates metrical problems and leaves verse 11 with a (3+5)line -- most unusual.

43

Dahood, Psalms, I, p. 206.

44

Reading m^eārā for MT mir^{eh}, "pasturage."

45

The versions read lby' as various forms of the verb bw'.

46

Note that, as in other cases, e.g., Isaiah 31:4, the imagery is extended by a clause introduced with >āser.

47

H.-J. Zobel, Stammesspruch, p. 40f.

48

Cross and Freedman, "The Blessing of Moses," JBL 67 (1948), p. 208, n. 67. Zobel, op. cit., p. 39 apparently takes Cross and Freedman to support exactly the opposite view.

49

The reading nōhēm is suggested by BH³ and many commentators. MT's mēhem is attested also by LXX, but is difficult to construe. We are supposing a haplography from an original layiš Šām, the final hm being a

later addition. (So A. B. Ehrlich, Randglossen, vol. IV, p. 107.) The difficulty resulting apparently led IQIs^a to the reading wē'ēn mayim, which, however, does not commend itself as original. See Kutscher, The Language and Linguistic Background of the Isaiah Scroll (Jerusalem, 1959), p. 429.

50

The difficulties of translating the verse and various suggestions are detailed in W. McKane, Proverbs: A New Approach (Philadelphia, 1970), p. 543f.

51

J. Muilenburg, "Ezekiel," in Peakes's Commentary (London, 1962), p. 579. So also H. G. May, Ezekiel, IB VI (New York, 1956), p. 163f.

52

The troublesome phrase mtrp bny 'lyt, I translate "on prey, my son, you have grown strong." See E. Sellin, "Zu dem Judaspruch im Jaqobssegen Gen. 49 8-12 und im Mosessegen Deut 33 7," ZAW 60 (1949), p. 60. Similarly, Speiser, Genesis, ad loc. A different solution is advanced by Zobel, Stammesspruch, p. 11.

53

Seeing in 'rsh a word for lion is suggested by the parallelism (as in 26:13). Dahood sees the form

with prosthetic aleph as a Phoenicianism. M. Dahood,
"The Phoenician Contribution to Biblical Wisdom Litera-
ture," The Role of the Phoenicians in the Interaction
of Mediterranean Civilizations, ed. W. A. Ward (Beirut,
1968), p. 128.

E. Beasts of Burden and Herd Animals

Old Testament poetical literature does not contain many references to CAMELS. The few that occur demonstrate well the devices of the poet in animal imagery, such as pairing the adult and its young.

A multitude of camels (g^emallîm) will cover you;
Young camels (bikrē) of Midian and Ephah (Isaiah 60:6).

or, the poet may pair camels with other like animals; beasts of burden or domestic herds.

They bear their riches on the shoulders of asses--their treasures on the humps of camels (Isaiah 30:6).

While not imagery in the strictest sense, "riders on camels" are mentioned in Isaiah 21:7 along with "horsemen in pairs" and "riders on asses" to indicate means of getting recent information from distant points. The number of camels is often given to indicate great wealth and power (Judges 6:5; 7:12; I Kings 10:2; Job 1:3; 42:12, et al.); and as a representative item of property, the loss of camels signals a general despoilation:

Their camels shall be plunder
(Their) herds of cattle booty (Jeremiah 49:32).

An interesting problem in translation is given by Ezekiel 25:5:

I will establish Rabbah (Rabbâh) as a
pasturage of camels
And Ammon (bēnē Ammōn) a corral for flocks.

Here the duality of the verse structure has led the poet to break up between the two *cola* the proper name of a city: Rabbath-Bene-Ammon (so in II Samuel 12:26, 27; 17:27 et al.). This is reflected in virtually none of the modern translations: indeed, it is almost impossible to do so.

A rather lengthy description of the activities of animals in heat, particularly the ASS, is utilized in Jeremiah 2:23f. as an image of the idolatrous practices of Israel:

(You are like) a swift she-camel
interlacing her tracks,
Or a wild ass accustomed to the steppe.
In her heat of desire,
she sniffs the wind.
Who can restrain her in heat?
Any (male) who seeks her
need not tire himself.
They will find her in her time.

[L. Koehler has made a suggested emendation, widely adopted, in his article, "Beobachtungen am Hebräischen und griechischen Text von Jeremia Kap. 1-9," ZAW 29 (1909), p. 35f. to read pôrsâh, "breaking out" (into the desert), based on the verb of LXX platunthēsetai, which is used to render prs in Gen. 28:14. It seems, however, that platunō means rather

"to spread out" than "break away," or the like, and while it is appropriate for the Genesis passage, it does not suit Jeremiah and is not to be preferred.

Recently, MT has been defended by K. E. Bailey and W. Holladay, "The 'young camel' and 'wild ass' in Jer. II, 23-25," VT 18 (1968), 256-60. This article, incidentally, gives a convenient summary of suggestions of the various commentators. According to Bailey and Holladay, we are to understand the initial bi-colon as one of ambivalence ("like a camel or like a wild ass"). The feminine verbal forms are chosen because of the consistent feminines from verse 16 on. The authors note that only the male camel comes into heat, not the female, and that the emphasis in bikrāh is on youthfulness (as also Akkadian bakru, see AHw and CAD s.v.) rather than sex, stressing the "skittery" nature of the young camel. They then document the "dramatic and vulgar habits" of the female ass in heat. The dual reference is picked up again in verse 25 with reference to both "feet" (as is said of the camel) and "throat" or "appetite" (cf. the reference to

the "desire" of the wild ass). Their treatment is most convincing.]

There remains a very ancient passage which needs discussion: Gen. 49:14. Recent surveys do not advance the study of this passage to any degree.

[The treatment of H.-J. Zobel in Stammesspruch, p. 16f. is rather brief. He remains with "strong-boned ass" as a translation of hmr grm, although this yields little sense. The passages Job 40:18 and Prov. 25:15, cited by Zobel for support on p. 16, n. 72, in no way suggest a satisfactory meaning for grm here. S. I. Feigin, "Hamor Garim, 'Castrated Ass,'" JNES 5 (1946), 230-33, suffers mainly in failing to give evidence for his supposition and proposed translation, in that he does not show that asses were actually castrated in antiquity (or modern times either, for that matter). He does give a valuable catalogue of commentators' opinions on the verse.]

All that can be gleaned from the versions is support for the material reading grm, which was connected with gerem "bone" (except LXX, which smacks of conjecture here). Since all attempts to link the word to gerem yield little sense, the obvious solution is to see grm

as gér "resident alien" plus enclitic mem (or attach the mem to the following word). This suits admirably what is said of Issachar at the conclusion of verse 15, "he undertook corvee labor." W. F. Albright has made sense out of the text by redivision and revision of the vocalization of hmr.

Yissákar hammôr gér

marbîs bén (ham)mišpetáyim

Issachar is a (resident) alien donkey-driver
Who camps between the (camp-fire) hearths.¹

The most frequently used term for an ass is hamôr, although its utilization in poetry is not as extensive as one might expect in a society where the ass played such an important economic role. It does serve as 'typical' of personal property, along with the ox.

They drive off the ass of the fatherless,
They take in pledge the ox of the widow
(Job 24:3).

Compare the protestation of Suwardata in the Amarna correspondence (EA 280:26ff.): "Let the king, my lord, inquire whether I have taken from him a man or a single ox or an ass."

Isaiah contrasts the stupidity of breaking covenant with the elemental knowledge that even an ox or an ass possess.

The ox knows its owner
 and an ass his master's stable.
 (But) Israel does not have any knowledge,
 my people does not understand
 (Isaiah 1:3 Cf. Jer. 8:7, supra, page 56).

Another section of Isaiah, 32:15-20, of disputed authorship, describes the almost messianic situation (rather than paradisaical picture elsewhere, i.e., 9:1-7; 11:1-9) under just kings, including the following, again pairing the ox and ass:

Happy will you be, sowing alongside every waterway,
 Freeing the tether of the ox and the ass
 (Isaiah 32:20).

The casual manner of discarding the corpse of an ass serves Jeremiah as an image of ignominious burial for an evil king (Jeremiah 22:19; cf. 36:30):

He will be buried with the burial of an ass;
 dragged along and cast out
 beyond the gates of Jerusalem.

The sexual activity of various equines is alluded to often in poetic imagery (Hosea 8:9; Jer. 2:24; Jer. 5:8; 13:27). Ezekiel 23:20 seems to show, by its structure, poetic fragments imbeded in prose: the pairing of two equines, the horse and the ass.

She lusted after their male prostitutes,
 whose members were like asses' members,
 and whose issue was like horses'
 issue.

[This type of comparison is frequent in Mesopotamian incantations. See R. D. Biggs,

ŠA.ZI.GA: Ancient Mesopotamian Potency Incantations, Texts from Cuneiform Sources II (Locust Valley, N.Y.; 1967) No. 1, p. 17, lines 12-13:

Incantation: Wild ass who had an
erection for mating,
Who has dampened your ardor?
Violent stallion whose sexual excitement
is a devastating flood . . .

Compare No. 32, line 27: "Let him swell up
like an as [s?]. See also Nos. 2, 5 and 14."²

Asses must, of course, be treated according to their disposition. This serves as a model in human affairs:

The whip for the horse
--the bridle for the ass
--a stick for the back of fools
(Proverbs 26:3).

The she-ass (ātōn), is often paired with its offspring the ass-foal (ayir).³ This, along with other considerations, has led Albright to propose for Judges 5:10:

rōkēbē ātōnōt šeḥōrōt
yōšēbē ‘al mdn ⟨ayir⟩

0 riders on tawny she-asses,
Ye who sit on caparisoned (male donkeys) ?⁴
Zechariah 9:9 is pertinent here, with ayir ben
ātōnōt parallel to hamōr, again the adult and its offspring.⁵ Genesis 49:11 employs the same device:

Binding his ass (īrōh) to the vine,
To the grape vine his asses' colt (bəni
ātōnōt)⁶

The wild ass or ONAGER (pere') is consistently connected with the steppe and wasteland (Jer. 2:24; Job 24:5; Job 39:5; Jer. 14:6; [48:6 ?]). To the foregoing examples should be added now Genesis 16:12: pere' 'ādām, "wild ass of the steppe," a characterization of the bedu Esau. M. Dahood has established the meaning "earth, steppe" for the masculine 'ādām, like the feminine 'adāmāh.⁷ This conventional expression is similar to the Akkadian "wild ass of the steppe" (sirrimu sēri),⁸ and says much the same of Esau as is said of Enkidu in the Gilgamesh Epic, where he is characterized as having a gazelle for a mother and a wild ass for a father, one who frequents the steppe-land (cf. ANET, 506b).⁹

The wild ass is paired with other denizens of such territory, as the jackals (Jer. 14:6), "beasts of the steppes" (Psalm 104:11) and, in its feeding behavior, with an ox (Job 6:5; see Daniel 5:21).

Onagers were prized for breeding with domestic strains of the ass, and there are references to this practice in Assyrian texts.¹⁰ One may wonder if this is not what lies behind the grouping of ideas in Hosea 8:9:

For they have gone up to Assyria--
A solitary wild ass.¹¹
Ephraim has hired lovers.

The 'arôd is another term for the onager, alternating with pere' in Job 39:5, and most probably also Isaiah 32:14 and Jer. 48:6, both passages similar to common curse formulae.

For the palace will be forsaken,
the populous city deserted;
The hill and the watchtower
will become animal lairs perpetually.
A pleasurable place for wild asses (perâ'îm);
a pastureland for onagers ('arôdîm).
(Isaiah 32:14).¹²

Flee and save your lives!
And become like an onager (kē'arôd)
in the steppes!¹³
(Jer. 48:6).

The Akkadian curse material has been assembled by Hillers.¹⁴ Typical of these is that of the Esarhaddon Treaty, lines 419-21:

May Sin, the luminary of heaven and earth,
clothe you in leprosy and (thus) not permit
you to enter the presence of god and king;
roam the open country as a wild ass or gazelle!
(ANET, Suppl., 538a).

With Jeremiah 48:6 compare especially the Annals of Tiglath-Pileesar (ANET, 284a):

(Samsi, queen of Arabia) . . . she herself
fled to save her life to the town Bazu, a
waterless region (lit.: a place of thirst)
like a wild donkey mare.

The pered, MULE, does not figure in poetry, with the exception of Psalm 32:9, where it is paired with the horse as an animal whose inclinations must be curbed with bridle and bit.¹⁵

The phrase "strong as a bull" is one utilized by the Old Testament poet as well as his modern counterparts. Referring to the defeat of the Assyrians, Isaiah presents Yahweh's claim:

Like a bull I have brought down the enthroned ones
(Isaiah 10:13).

One is reminded immediately of the heraldic representations of the Egyptian palettes, where the tossing bull symbolizes the sovereign's defeat of his enemies. See, e.g., ANEK, Nos. 291 and 297. In Jeremiah 46:15 the Apis bull, emblematic of the Egyptian might and divine protection as the incarnation of Ptah, is referred to in the prophets taunt song, "Why did Apis flee? (read: nās haf) // your bull did not stand." Verses 20 and 21 call Egypt, by contrast, a "pretty heifer" and her mercenaries "fatted calves" fit for slaughter. It is the formidable power of the bull that supplies the meaning of Psalm 22:13, "Many bulls (pārîm) have surrounded me, // Bulls ('abbîrē) of Bashan have encircled me."

In the sacrificial context of Isaiah 34:6-7 there is no need to see anything other than a reference to animals:

Yahweh has a sword steeped in blood,
It is sated with fat,
From the fat of lambs and goats,
From the fat of the kidneys of rams.

For there is a sacrifice for Yahweh in Bozrah,
 A great slaughter in the land of Edom.
 Wild oxen (and fattlings) ¹⁶ shall fall,
 Both steers and bulls,
 And their land shall be sated with blood,
 Their soil sated with fat.

When the composition of the chapter is viewed as a whole, one can posit the extermination of domestic stock as a prelude to the land becoming a haven for exotic beasts (v. 11ff.). So, in Jeremiah 50:27, a doom oracle on Babylon, "Slay all her bulls" (i.e., end the fertility of the herds), is paralleled by the destruction of grain supplies in verse 26. This is not to deny that the destruction of people is implied in the total description, but we do resist making bullocks into warriors: who then is symbolized by the grain?

[The opposite view, namely, that the passage from Jeremiah as well as that from Isaiah 34, refers to "classes of people" is adopted by P. D. Miller, Jr., "Animal Names as Designations in Ugaritic and Hebrew, "Ugarit-Forschungen 2 (1970), 177-186, esp. p. 184. The article as a whole seems to draw together all possible instances of the use of animal names for designating persons, including many suggested instances which must be rejected on closer examination. So, for

example, the suggestion that s^ebî in Isaiah 23:9 is such a name (after Dahood): s^ebî, "beauty" is an established word in the vocabulary of Isaiah, and the combination with the term gā'ōn "glory" is attested in Ezekiel 7:20. The progression of words in Is. 23:9, "glory, beauty and honor" does not need any "improvement" by introducing "gazelles," i.e., "princes." Or again, Miller cites the reading 'ēlîm "rams" at Psalm 29:1 concluding (p. 186): "Although this is not the preferred reading, it is an example of the practice presented here."
How this can be, I know not.]

The term 'abbîr is used also of "stallions" -- a meaning clearly indicated by the demands of parallelism and context.

From Dan is heard the snorting of his horses (sūsayw)
From the noise of the neighing of his steeds ('abbîrāyw) the whole land quakes (Jeremiah 8:15).

The noise of the horses awakens the picture of an advancing army. It is chariot horses that the writer had in mind. This is spelled out in Jeremiah 47:3:

At the noise of the pounding of his stallions' hooves --
The rattling of his chariots --
The rumble of their wheels

The composer of the poetic song in Judges 5 uses the same motif:

His mighty chargers pounded;
Hammered the hooves of the horses;
Raced chariot-races his stallions¹⁷
(Judges 5:22).

The phrase of Jeremiah 50:11, "neighing like stallions," is attributed to the Babylonians and strikes a different note: the picture, paired with "frisking like calves at pasture," seems to imply unhindered movements.¹⁸

['abbîrîm, "strong ones," "leaders" in I Sam. 21:8, Job 24:22; 34:20, Lam. 1:15, need not be seen as an extension of meaning from "bull" or "stallion," but as reflecting the root meaning of the word "strong." The same applies, of course, to the expression 'abbîrê lēb "strong of heart," "stubborn" in Isaiah 46:12; Psalm 76:6.

'abbîrîm "strong ones" refers apparently to "angels" in Psalm 78:25. See Wisdom of Solomon 16:20 and the expression of Psalm 103:20 gibbôrê kōâh, "men of strength," referring to divine emissaries.]

Psalm 22 mentions "bulls" among many other animal metaphors describing the adversaries of the sufferer:

Mighty bulls (*pārîm rabbîm*) surround me,
 Bulls of Bashan (*'abbârē bâšân*) encircle me
 (Psalm 22:13).

It must remain debatable whether or not the mention of enemies in animal metaphor is meant to indicate demonic beings in animal guise. Admittedly Psalm 22, with its vivid references to death (vv. 16, 30), presents the best occasion for those who would see in the animals mentioned (bulls, lions, dogs) "hellish fiends" from the underworld. Still, there is nothing to compel one to this point of view in the Psalm, and even less outside Psalm 22.¹⁹

There remains the mention of bulls in Psalm 68:31. Coming from what Dahood refers to as "widely admitted as textually and exegetically the most difficult and obscure of all the psalms."²⁰ The verse remains quite unique and equally obscure. Other uses of bull-imagery in the Old Testament do not offer anything toward solution.²¹

The CALF (*'egel*) is among those animals mentioned as grazing and resting in deserted cities: Isaiah 27:10 (for parallels, see above, page 78f.); and see also Isaiah 7:25 where oxen and sheep are said to feed on formerly cultivated land.

A common image is the frolicking of calves: a picture of carefree behavior.

You shall go out gambolling like calves from
the stall.²²
(Malachi 3:20).

Compare the Esarhaddon text, (ANET, 289b):

. . . they went over in masses to me and
rallied behind me. Like lambs they
gambolled

Psalm 29:6 refers only to the motion:

He makes Lebanon skip like a calf
Sirion (he makes to skip) like a young
wild ox.²³

But such frolicking often implies in addition a lack of concern or awareness of the seriousness of the situation and of impending disaster (so Jeremiah 50:11 [of Babylon]: "frolic like a calf in the grass"²⁴ -- the following verses tell of destruction to come); or a need for discipline (so Jeremiah 30:18). By contrast, the "well-trained heifer" ('eglah melummādāh) of Hosea 10:11 exemplifies an acceptance of discipline (i.e., the calf that treads grain without being yoked).²⁵ Where the WILD OX (Auerochs; rē'ēm) is mentioned, it is usually with reference to his magnificent horns -- "horn" being the symbol of power (e.g., I Samuel 2:1; II Sam. 22:3 [= Ps. 18:3]; Jer. 48:25; Psalm 75:5, 11; 89:18; 148:14; Lam. 2:3 and elsewhere).²⁶

Thus the poet writes in Deut. 33:17, speaking of the tribe of Joseph:

His first-born bull has majesty,
 His horns are the horns of a wild ox.
 With them he gores the nations,
 He attacks (?)²⁷ the ends of the earth.

The Psalm writer speaks of his (unspecified) victory
 in similar terms:

You have exalted my horns(s),
 like (those of) the wild ox
 (Psalm 92:11).

And in Psalm 22:22, this imagery is paired with that of
 the lion in describing a powerful enemy:

Save me from the mouth of the lion;
 And give me victory²⁸ over the horns of
 the wild oxen.

The consistency of the imagery involving the ox must
 be taken into account in attempts to understand the dif-
 ficult phrase of Numbers 23:22; 24:8 kētō‘apōt rē’ēm
lô, but the term remains obscure. W. F. Albright,
 "The Oracles of Balaam," JBL 63 (1944), p. 215, n. 47
 explains it as "impetuosity" comparing Arabic wgf "to
 run fast." His translation of the entire phrase
 (ibid., p. 224) is "While he stormed like a wild bull."

The OX (or STEER, also BULL; šôr), despite being
 one of the most common domestic animals in ancient
 Israel, does not figure to any great extent in poetic
 imagery, which shows a preference for more exotic beasts.
 Job 24:3 (cited above, page 112) mentions the ox as
 typical of personal property. The possession of a
 fertile bull is a mark of prosperity -- Job 21:10. The

ox serves as typical of animal sacrifice in Psalm 69:32 (again, in an "anti-sacrificial" context. See below, page 125). A fattened steer is cited as an element of a luxurious dinner in Prov. 15:17:

Better a portion of herbs where there is love
Than a fattened steer with hatred.

The ox is an animal of predictable behavior (see Job 6:5) and with that, quite dumb: The man who is captivated by the allure of a loose woman is likened to the ox:

He goes after her impulsively
Like an ox goes to the slaughter
(Proverbs 7:22).

The writer of Job complains, "Why are we considered as cattle (b^ehēmāh); Why are we stupid (?) in your sight?" With this compare Psalm 73:22 "I was stupid and ignorant; I was <like> cattle (b^ehēmōt) with you."²⁹ But, with all this, the ox is "smarter" than apostate Israel:

The ox knows its owner
and an ass his master's stable.
(But) Israel does not have any knowledge,
my people does not understand
(Isaiah 1:3).³⁰

An additional instructive example for men is given from the experience of the ox in Proverbs 14:4:

Without the labor of oxen, the manger is bare;
Abundant crops depend on the bullock's strength.³¹

That is, the tiring efforts of the oxen in the field serve, in part, to produce their own sustenance. A man should recognize, therefore, that good things come to him through hard work for others.³²

Imagery involving the KID (gedî) stands apart from that of other herd animals. It is a designation for the smallest of the flocks, and consequently the most helpless (see Judges 14:6, "he (Samson) tore the lion as if it were a kid").³³ This heightens all the more the impact of the peaceful cohabitation of the kid with the wolf in the "messianic" age: Isaiah 11:6, see above page 80.

Perhaps related to the above is the passage in I Kings 20:27 that, compared to the Aramaeans who "covered the countryside," the Israelites who went to engage them seemed like "two flocks³⁴ of goats" ('izzîm).

There is a fair volume of imagery involving SHEEP and GOATS in the O.T. These animals figured prominently in sacrifices and are often mentioned in such a way as to evoke the entire sacrificial system, usually with a negative tone.

Behold, to obey is better than sacrifice,
And to hearken (is better) than the
fat of rams (lêlim)
(I Sam. 15:22b).³⁵

What is your multitude of sacrifices to me?
 says Yahweh.
 I am sated with holocausts of rams ('ēlîm)
 and the fat of fattlings (m̄rī', īm)
 In the blood of bulls (parîm) and lambs
 (k̄bāsîm) and he-goats ('atûdîm)
 I have no pleasure
 (Isaiah 1:11).

With what shall I approach Yahweh?
 (and) bow myself before the God of
 the Heights?
 Should I approach him with holocausts --
 with year-old calves? ('aḡâlîm bēnē
 sānāh)
 Will he be pleased with thousands of rams
 ('ēlîm)
 with myriad streams of oil?
 (Micah 6:6-7).

I do not "take" bulls (pār) from your estate
 (nor) goats ('attûdîm) from your folds.
 For all the beasts of the scrub are mine
 --the animals of the luxuriant hills³⁶

 Do I feed on the flesh of bulls ('abbirîm)
 Do I drink the blood of goats ('attûdîm)?
 (Psalm 50: 9,13).

A similar list, but in a positive context, is given in Psalm 66:15. Of disputed import is Isaiah 43:23, "You have not brought me your sheep for holocausts, etc." Muilenberg comments, "Israel could hardly be censured for not offering sacrifices in a foreign land, for they were doubtless forbidden (cf. Deut. 12:13-14). The meaning seems to be: 'You did not offer me sacrifices, and indeed I did not require them. But in their stead you offered me the gifts of your sins. You have been weary of me and have not called upon me in worship of any sort.'"³⁷

"Like a lamb to the slaughter," so common in our own literary tradition, is, of course, rooted in biblical imagery: see Jeremiah 51:40, where lambs, rams, and he-goats are again enumerated, and Jer. 11:19 ("I was led to the slaughter like an unsuspecting lamb [kebēs >allūp]) and Isaiah 53:7, "he was led like a sheep (seh) to the slaughter and like an ewe (rābēl) that is dumb before its shearer, he opened not his mouth."³⁸

As one of the most common items of property, the wish for abundance of flocks and their products signals general prosperity: the key passage in this regard is Deut. 32:14:

The butter of cows (bāqār)
 And the milk of goats (ṣ'ōn)
 With the fat of lambs (kārīm)
 And Bashan-rams ('ēlīm), and he-goats ('attūdīm)

See also Proverbs 27:23-27.

The threat of wide-spread despoilation is couched in similar terms:

Yahweh has a sword covered in blood,
 it is smeared with fat.
 From the blood of lambs (kārīm)
 and he-goats ('attūdīm)
 From the fat of the kidneys of rams ('ēlīm)
 (Isaiah 34:6).

The figure of a person as a "lost sheep" is limited to Ps. 119:176 (kēsēh 'ōbēd). Similar, however, is the seh pēzūrāh "scattered sheep" of Jer. 50:17, driven in

flight to all directions by the lion. The whole serves as the image of the desperate plight of Israel.

The mixed imagery of MT at Hosea 4:16 ("For Israel is stubborn like a stubborn heifer; Should Yahweh now feed them like a lamb in a broad pasture?") renders the verse somewhat suspect. The section verses 15-16 presents Ephraim serving as an example for Judah -- an example not heeded. I read the second colon:

‘attāh yir‘ū [-m]³⁹ yehūdāh kēkebēš bammerhāh
"And now Judah feeds like a lamb in broad pasture."

This restores a parallelism of Israel and Judah, as in verse 15a, and reinforces the tenor of the verse, that Judah learns nothing from the experience of her neighbor to the North and continues a disasterous course as unconcernedly as a sheep at pasture.

Certain names of animals are used metaphorically of persons. So 'êlîm "rams," "leaders of the herd" is used of chieftans. Exodus 15:15 refers to the 'êlê mō'âb, a phrase paralleled by 'allûpê 'edôm, "leaders of the tribal levies of Edom." Other instances may be found in II Kings 24:15 and Ezekiel 32:21. Similarly the term ‘attûdê ‘âreg "he-goats of the earth" is paralleled in Isaiah 14:9 by kol malkê gôyim "all the kings of the nations." The ‘attûdîm of Zech.

10:3 is coupled with "shepherds," i.e., "kings," and this would indicate that the usage is metaphorical, which Is. 14:9 by itself does not. The 'attûd as a leader figures in the simile of Jeremiah 50:8

Out, and be like bellwethers
Leading the flock!⁴⁰

There is some indication that these usages are restricted to high officials, below the level of kings. In Ezek. 39:18 'êlîm, kârîm, 'attûdîm, pârîm (all further specified as fattlings of the kind found among the herds of fertile Bashan) are used to refer to the princes (nêšî'îm) and military heroes (gibbôrîm) of the earth. This imagery, if it really can be termed that, is all the more suitable in this instance, since it figures in the picture of beasts and birds being invited to feast on the bodies of the slain warriors and chieftans. Ezek. 34:17 might be understood also to refer to high officials, since shepherds-kings have been dealt with in vv. 7-10.

Similar imagery is found in Ugaritic, particularly CTCA 15:IV:6-7 (III Krt), where Ginsberg translates:

Summon my seven [ty] peers (lit. "bulls")
my eighty [bar] ons (lit. "gazelles")⁴¹

See also CTCA 5:V:8-9, "your seven lads // your eight 'boars'".

Notes to Section E

¹

W. F. Albright, Yahweh and the Gods of Canaan (Garden City, N.Y., 1968), p. 266 (c). hammôr is the North-Israelite Pronunciation of later Hebrew and Aramaic hammâr, Arabic hammâr, "donkey-driver." Albright (orally) credits this solution to F. I. Andersen. See now F. I. Andersen, The Hebrew Verbless Clause in the Pentateuch, Journal of Biblical Literature Monograph series, Vol. XIV (Nashville and New York, 1970), p. 123, n. 6.

²

The parallels from the potency incantations are much more relevant than the rather obscure reference cited by O. Loretz, "Eine sumerische Parallele zu Ez 23,20," BZ 14 (1970), 126, in reference to Heimpel, Tierbilder, No. 27.1 (page 258).

³

The traditional rendering "foal" (so, e.g., LXX) was challenged by L. Koehler, Kleine Licher: Fünzig Bibelstellen erklärt (Zurich, 1945), pp. 52-57, who proposed "male adult ass" or "steed" (Eselhengst). His objection that a foal is too young and weak to support a rider is not pertinent to the question. The terminology derives from poetic usage. That an animal is described as offspring of its mother implies nothing.

about its age. Further discussion by M. Noth, "Old Testament Covenant-making in the light of a Text from Mari," The Laws in the Pentateuch and Other Studies, trans. by D. R. Ap-Thomas (Philadelphia, 1967), 108-17.

The meaning "foal" has recently been defended by M. Held, "Philological Notes on the Mari Covenant Rituals," BASOR 200 (1970), 32-40. See in addition the remarks of M. Pope, Job, Anchor Bible 15 (Garden City, N.Y., 1965), p. 83.

4

Following, in part, an unpublished suggestion of D. R. Hillers, who connects mdn with the Ugaritic term mdl, which apparently means to put a riding-cloth over the back of an animal. See the discussion, with references, in W. F. Albright, Yahweh and the Gods of Canaan (New York, 1968), p. 49f. and note 102, and J. C. Greenfield, "Ugaritic mdl and Its Cognates," Biblica 45 (1964), 527-34.

5

rōkēb 'al h²môr (Zech. 9:9) suggests another possibility for Judges 5:10, namely, yšby 'l <h> mr:m! (for MT mdyn). md and mr are just as similar in the archaic script as in the square script.

6

For the historical inferences, W. F. Albright, Yahweh and the Gods of Canaan, p. 90f, (quite at

variance with Zobel, Stammesspruch, pp. 14, 75f.).

7

M. Dahood, "Zacharia 9:1, 'ê̄n 'ādām,'" CBQ 25 (1963), 123-24. See also KB³ s.v. The pertinent passages are Prov. 30:14b, Job 32:21; 36:28; Zech. 9:1 and 13:5 and, in connection with Gen. 16:12 -- Job 11:12,

8

See J. Nougayrol, "Sirrimu (non *purîmu) 'ane sauvage'," JCS 2 (1948), 203-8.

9

See also ANET, 438a (= BWL 144-45, line 28); "The abode of the wild ass running to and fro is the desert;" from The Dialogue of Pessimism. See BWL, p. 325 note 22 for further references.

10

See W. F. Albright, "Midianite Donkey Caravans," in Translating and Understanding the Old Testament, Essays in Honor of Herbert G. May (New York, 1970), p. 201 with references to other literature.

11

pere' bôdêd bears a close resemblance to the Sumerian designation du_X-ûr-AŠ.DU-e, "the ass that goes by itself," which seems to be the designation of a certain species of wild ass, perhaps equivalent to the Akkadian akkannu. If, however, pere' bôdêd together

forms the proper name, the phrase of Hosea, as is, is untranslatable [pere' bôded 16]. For the Sumerian, see Heimpel, Tierbilder, p. 267, with the literature cited there.

12

For suggested emendations, see the commentaries.

13

For the difficulties of the verse, see especially the commentary of Bright, and W. Rudolph, "Zum Text des Jeremia," ZAW 48 (1930), 285.

14

D. R. Hillers, Treaty-Curses, pp. 15-16, with references.

15

On this passage, see Dahood, Psalms, I, ad loc., and G. Castellino, "Psalm XXXII 9," VT 2 (1952), 37-42, for a history of interpretation.

16

See BH³. Procksch (Jesaia I, KAT IX [Leipzig, 1930]) defends the reading 'ammîm and translates "Da fallen als Büffel 'Völker'; als Farren 'das Volk' ('am) der Starken."

17

The translation is that of F. M. Cross, Jr., Studies in Ancient Yahwistic Poetry (Unpublished Doctoral Dissertation; The Johns Hopkins University,

Baltimore, Md., 1950), p. 30. The underlying consonantal text would be:

tdrkm p (r) s 'z

hlm 'qb ssm

dhr [] dhrt 'brw

See ibid., pp. 35-36 and W. F. Albright, "The Song of Deborah in the Light of Archaeology," BASOR 62 (1936), p. 30.

18

See the commentaries ad loc.. The attribution of this verse to Jeremiah is doubtful.

19

See the commentaries ad loc., and Kraus, Psalmen I, Excursus at Psalm 2:5 (p. 180); especially the material brought together by N. J. Tromp, Primitive Conceptions of Death and the Nether World in the Old Testament, Biblica et Orientalia 21 (Rome, 1969), index, sub Ps. 22 and esp. pp. 164-65, note 29. Tromp leans toward the position that the animals refer to demons, but is not totally convinced.

20

M. Dahood, Psalms, II, p. 133.

21

An attempt at solution of some difficulties of the the Psalm is W. F. Albright, "A Catalogue of Early

Hebrew Lyric Poems (Psalm LXVIII)," HUCA 23 (1950-51), pp. 15-16, 32-33, 39. Dahood's attempt to construe the Psalm as a unit is not convincing. The assumed reference to Egypt as the "beast of the reed-brake" is suspect. The idea seems to have been imported from Psalm 106:9, but there is no real similarity in the two verses. Psalm 68:31 (against Dahood) is thoroughly mythological. The verb g'r in connection with animals refers to their sound; it is used of the noise made by a stallion in the Ugaritic Hippic text UT 56, line 23; further, hayyat is most naturally taken as a collective; hence translate "the beasts of the brake bellow."

22

"Calves from the stall" is used by Amos as a signal for the rich eating habits of the prosperous, along with "lambs of the flock" (Amos 6:4. See also I Sam. 28:24). When Egyptian mercenaries are so designated (Jeremiah 46:21), the image brings along with it their imminent slaughter. Volz and Rudolph take the imagery as implying that the soldiers have grown fat and lazy, a note I fail to find there.

23

Read wayyargēd (-mi/ma [enclitic mem]) k^emō ēgel, etc. Note the variant appellations in parallelism referring to the same thing (ēgel/ben r'ēmīm) and see Psalm 104:4; Habakkuk 3:6.

24

Reading tāpūšū k^eegel (or k^eeglāh/k^eeglē)
baddešē. See BH³.

25

On the other problems of this passage and the details of its imagery, see the excellent discussion of Rudolph, Hosea, KAT XIII,1 (Gütersloh, 1966), pp. 201-03.

26

So also in cuneiform literature. See the numerous examples in Heimpel, Tierbilder, p. 79ff.

27

See the remarks of Cross and Freedman, "The Blessing of Moses," JBL 67 (1948), 207 n. 60; and W. F. Albright, "The Psalm of Habakkuk," Studies in Old Testament Prophecy, ed. H. H. Rowley (Edinburgh, n.d.; c. 1947), p. 13, n. i on Hab. 3:4. Albright compares the phrase of Ugaritic text CTCA 6:VI: 17-18, ynghn / kr'umm "they gore like wild oxen," said of the conflict between Baal and Mot.

28

Taking the verb ‘nw as "to afflict, conquer, subjugate" with Dahood. See his Psalms, I, p. 116 and 142, with reference to other literature and additional biblical examples.

29

Dahoood, Psalms, II, ad. loc. and Pope, Job, p.

271.

30

See above, page 56 for parallels.

31

The translation is that of R. B. Y. Scott,
Proverbs, Anchor Bible 18 (Garden City, N.Y., 1965)
p. 97, who properly, in my opinion, connects the mean-
ing of the passage with II Thessalonians 3:10 "If one
will not work, he shall not eat." For the semantic
development of bar "clean" and therefore also "empty,"
see M. J. Dahoood, Proverbs and Northwest Semitic
Philology, Scripta Pontifici Instituti Biblici 113
(Rome, 1963), p. 30f.

32

For a contrary opinion, see W. McKane, Proverbs,
p. 470f., who sees the verse as a maxim for farmers.
The results are ill-fitted to the tenor of chapter
fourteen of Proverbs. McKane translates: "Where there
are no oxen, there is a crib of grain, but crops are
increased by the strength of an ox." and comments "the
balance between the grain which the oxen consume and
their productive capacity has to be ascertained. They
are a kind of capital equipment which has to be used
economically; it is important not to have too few or

too many, but to employ the number which secures the maximum production at the lowest cost."

33

Similarly, in the "Sumerian Lamentation over the Destruction of Sumer and Ur" (ANET, Suppl., 615a) we find the following: "Those who fled from it were devoured by the wild beasts like fleeing kids."

34

The meaning of haśipē is uncertain. The translation "flocks" follows LXX's pōimnia. See KB³ with reference to the study of Driver, "Studies in the Vocabulary of the Old Testament, II," JTS 32 (1931), 255, who relates the word also to the yhsp of Psalm 29:9.

35

See the Egyptian "Instruction for King Meri-Ka-Re," ANET, 417b, "More acceptable is the character of one upright of heart than the ox of the evildoer." Translator J. A. Wilson calls attention to I Sam. 15: 22 in a note.

36

Reading harērē 'él as in Ps. 36:7. The final pe represents the conjunction pa. See Dahood, Psalms, I, pp. 307f. and 220, 293 for discussion and references. This well-known and widely documented construction has been missed by the translators of both NEB and NAB.

The element 'ēl is understood here as a superlative, referring to exquisite, divine qualities. Our attempt at translation renders "luxuriant" rather than, e.g., the "towering" (so Dahood) of the mountains, which would make them less suitable for flocks and herds. It is our contention that the nuance must be drawn from the context; "towering mountains" is suitable at Psalm 36:7. Not all translators accept this interpretation, as is well known, and some would prefer "mountains of El," "cedars of El," and the like. As this is incidental to our discussion here, we omit a detailed argument.

37

Isaiah, IB V (Nashville, 1956), p. 498.

38

Both terms refer only to one animal here. The passages cited following exemplify the extension of imagery by giving lists of animals with something in common, such as their use in sacrifice.

39

Read as enclitic mem, or delete. Compare the wording of Isaiah 5:17 wēra'û k^ebāsîm k^edābrām "and the lambs graze (there) as in a pasture." The second colon is not in good order. Read: wēhorâbôt mēhîm yō'kélû "and fattlings will eat off the rubbish

mounds." gēdāyîm (so read, following LXX for MT's gārîm) "aliens" is a gloss on mēhîm. This verse conveys the common image (Is. 17:2; 27:10; 32:14; Zeph. 2:6, 14) of ruined cities becoming grazing areas for flocks and herds. For a detailed discussion of the verse see H. Wildberger, Jesaja, BKAT X,3 (Neukirchen, 1968) pp. 175, 178.

40

Translation J. Bright, Jeremiah, p. 340.

For Akkadian lulîmu "stag" used as an appellation of leaders, see AHw, p. 562.

On the article of P. D. Miller, Jr., "Animal Names as Designations in Ugaritic and Hebrew," Ugarit-Forschungen 2 (1970), 177-186, see my remarks above, page 118f.

F. Game Animals and the Horse

The DEER (the male ayyāl "stag"; female ayyālah "hind") figures in animal imagery in several connections. Its movements are noted in a famous passage of Isaiah:

Then shall the lame man leap like a stag,
and the tongue of the dumb sing
(Isaiah 35:6).

The second portion of the verse specifies the reason for this extraordinary action: "for waters will break forth in the desert and streams in the wilderness."

An associated image refers to the sure-footedness of deer:

He made my feet like (those of) hinds,
and causes me to stand on the heights
(Psalm 13:34 = II Samuel 22:34).¹

Habakkuk 3:19 belongs together with the aforementioned passages:

The Lord Yahweh is my strength
who makes my feet like (the feet of)
hinds,
and makes me to range the heights.²

Stags are noted as the object of the hunt in Lamentations 1:6:

Her princes have become like stags
who do not find pasture.
They run without strength
before the pursuer.

In defense of MT ayyālim against the êlim reflected in the Greek Text, one may adduce the imagery of Esarhaddon's Vassal Treaty, line 576,

Just as a stag is chased and killed, so may your avengers chase and kill you, your brothers, your sons.³

The same imagery occurs in Job 19:22, "why do you pursue me like a stag?" The text is to be read k^emō payyāl, against k^emō 'ēl "like God", accepted by Pope, Job (Anchor Bible 15; New York, 1965). The import of the second colon quite escapes me. The stag may be restored to an additional passage: Proverbs 7:22c. The solution to the impossible MT (ūk^e'ekes 'ēl mūṣar 'ewīl) "and like a bangle to the discipline of a fool" is offered by G. R. Driver⁴, who repoints to read ūk^e'akkēs 'ēl mōsēr payyāl "and like a stag skips into a noose," said of the man easily taken in by the harlot's charms. The result is nicely compatible with the simile of verse 23b, "like a bird darting into a snare."

Also serving in poetic imagery is the deer's attraction to, and dependence upon, watering places.

As a hind longs
for springs of water,
So do I yearn
for you, O God
(Psalm 42:2).

The problem of agreement in gender of MT k^eayyāl ta'arōg has been solved by J. Huesman, who saw here a mis-division of consonants, and reads k^eayyelet 'ārōg, the verbal form being the infinitive absolute.⁵ Similar imagery occurs in Ugaritic: see CTCA 5:I:16-17,

Lo, the wild oxen make for the pools,
The hinds make for the spring.⁶

The hind is singled out in Jeremiah 14:5 as being particularly affected in a time of severe drought, to the point of forsaking her young.

Although the saying concerning Napthali in Genesis 49:21 is too concise to supply conclusive clues to its meaning, several considerations lead us to adopt the following translation, following, in the main, the treatment of H.-J. Zobel:⁷

naptālî 'ayyālāh šelūhāh
hannōtēn 'imrē špr

Naphtali -- a hind running free;
He brings the messenger's word.

Zobel refers to the discussion of Mowinckel⁸ bringing to bear on the verse the phrase of Psalm 68:12, 'adōnāy yitten 'ōmer "the Lord makes announcement." Of interest is the conjunction of the verb nth and 'ōmer, as in Genesis 49:21,⁹ and the use of šipru in the Amarna archives, and elsewhere, with the meaning "message." The additional assertion of Zobel that "message of victory" is implied does not seem warranted.¹⁰ Should this understanding of the second half of the verse be correct, then the reading of the 'ayyālāh šelūhāh "a hind running free" is assured, first of all by its agreement with other imagery of the hind and secondly as

the alternative reading "a branching terebinth" (‘êläh
šelühäh) makes no sense.

Commentators are divided on the interpretation of Psalm 29:9 (yehôlēl ‘ylt). In our opinion the comparison with Job 39:1 (hôlēl ‘ayyâlôt) "the birthpangs of the hinds" is misleading, and indeed may have influenced the pointing of MT at Ps. 29:9. In the context of the Psalm (verses 6 - 8 mention Lebanon and the "brushland of Qadesh," both north-Canaanite locations) -- together with verse 9b, "it strips the forests", verse 9a can only mean "The thunder (lit: voice) of Yahweh bends (or uproots) the oaks (‘elôt). This yields a satisfactory sense and maintains the continuity of the imagery.¹¹

The point of comparison in Proverbs 5:19 where a wife is compared to "a lovely doe" (payyelet ‘ahâbîm) is most likely personal appearance. ‘ahâbîm is ambiguous, but the parallel ya‘alat hén points to pleasing physical features.¹² See also Proverbs 30:31.

The GAZELLE (sabî) is utilized to evoke the idea of speed. This is spelled out in reference to a certain Asahel, who was "fast on his feet like a gazelle on the open steppe" (II Samuel 2:18); and certain Gadites in David's band who were "like gazelles on the mountains in speed" (I Chronicles 12:9). Thus we may

suppose that the comparison to the gazelle in Proverbs 6:5 is to indicate a quick darting about from person to person in an attempt to make the best of a worsening situation, and thus "save yourself like a gazelle from the hunter,¹³ like a bird from the hand of the fowler." The same picture of quickly darting about fits the mention of the "hunted gazelle" (g^ebî mudâh) of Isaiah 13:14, as it is this type of action which would fit the parallel expression "like sheep which no one rounds up." The continuation of the verse supplements this imagery by stating that "every man will turn to his clan, and each will flee to his own territory" -- i.e., a helter-skelter dash for safety.

The IBEX (yā'ēl), or wild goat, is associated with rocky heights: "the high mountains are for the ibex", Psalm 104:18; "the ibex of the rocky regions", Job 39:1. Its mention in Psalm 104:18 in conjunction with the coney, and a glance at Proverbs 30:26 (see above, p. 83) indicate that what is intended is a reference to the usefulness of such places in God's created world, in spite of their formidable nature. I Samuel 24:3 records that a location called the "Wild Goat Rocks" was used as a hideout for David's band. The small number of references to the ibex in the Old Testament makes it

difficult to specify the intent of the comparison in Proverbs 5:19 of one's wife to "a graceful (?) ibex" (ya'calat hēn). Beauty is certainly included, but many have seen in addition a reference to fertility.¹⁴ The oft cited reference to Job 39:1 is ambiguous support in any case, as all that may be intended there is something done away from the sight of man.

Old Testament imagery mentioning the HORSE is almost exclusively associated with its military use. Since the employment of the horse was chiefly to draw chariots, the latter make a suitable, and frequent, parallel term.¹⁵

I will sing to the Lord, for he is greatly triumphant.
Horse and chariot (read: rikbō) he has cast into the sea
(Exodus 15:1 [= 21]).¹⁶

Their land is filled with horses (sūsim)
and their is no end to their chariots
(markabotayw)
(Isaiah 2:7).

Woe to those who go down to Egypt for help
and rely on horses
Who trust in chariots because they are many,
and in horsemen because they are very strong.
(Isaiah 31:1).

Advance, O Horses!
and rumble, O Chariots!
(Jeremiah 46:9).¹⁷

The absence of horses and chariots quite naturally signals the advent of peace.

I will cut off the chariot from Ephraim
and the horse from Jerusalem
The battle-bow will be cut off,
And he will declare peace to the nations
(Zech. 9:10).

Statements in the Wisdom Literature refer to more generalized observations of the horse's behavior than its military employment; specifically its need for control through bridle or whip:

A whip for the horse, a bridle for the ass;
And a rod for the back of fools
(Prov. 26:3).

Do not be like a horse or a mule,
without understanding,
Whose temper must be curbed with bit and
bridle.
(Psalm 32:9).¹⁸

The sexual activity of horses is used also in simile -- Jeremiah 5:8 and Ezekiel 23:20 (discussed, with parallels, above, page 113f.)

The most frequent mention of horses is to evoke the idea of military strength, and a vivid account of the ancients' impression of the war horse is given in Job 39:18-25. Here belong such passages as Psalm 20:8; Jer. 6:23 (=50:42); Amos 4:10; Nahum 3:2; Prov. 21:31; Ezek. 38:4, 14; 39:20; Zech. 10:3, etc. A stress on numbers of horses then expands the emphasis to that of an invincible army: Jer. 51:27, "horses (in number) like locusts." See also Isaiah 2:7; Ezek. 26:10.¹⁹

The din and melee of a military encampment is signaled by mentioning the noise of the horses (II Kings 7:6) and their snorting or the pounding of their hooves vividly portrays aspects of the battle (Judges 5:22; Jer. 8:16; cf. Is. 5:28).

The horse was used, of course, to achieve speed and mobility. This is often explicitly mentioned, the horse being sometimes compared to another animal noted for its swiftness ("swifter than eagles" Jer. 4:13; "faster than leopards" Hab. 1:8) but it is noted that it is not able to overtake the ostrich: see Job 39:18. Similar examples come from Egyptian sources: "horses . . . swifter than the wind" (ANET, 499a); "a horse . . . swift as a jackal" (ANET, 477a); and "his horses are like falcons in the midst of small birds" (ANET, 263a).²⁰

The futility of engaging in a foot race with a horse is mentioned in Jeremiah 12:5; the similarity of the parallelism suggests that the idea of speed and stamina also lies behind Psalm 147:10:

He is not pleased by the stamina of the horse,²¹
nor does he delight in the "thighs" of a man.

Seeking security in military forces is set in opposition to reliance upon God. In this polarized view of the prophets, the horse often serves to represent military might. A passage from Isaiah illustrates

the phenomena (given here as it includes reference to speed):

For thus says Lord Yahweh,
the Holy One of Israel:
"In returning and rest you shall be saved--
In quietness and in trust shall be your
strength."

But you were unwilling, and you said, "Not so!
We will speed by means of horses."

Therefore you will speed away;
And (you said), "We will drive swift ones,"
Therefore your pursuers will be swift
(Isaiah 30:15-16).

Micah 5:9; Amos 2:15 and Proverbs 21:31.

Notes to Section F

¹

NEB renders "makes me swift as a hind": one may suppose that this attempt at precision is based, not without some reason, on those other descriptions of warriors compared to the related species of gazelle, where swiftness is specified as the point of comparison. (See GAZELLE, and II Sam. 2:18; I Chronicles 12:9).

²

W. L. Moran, "Some Remarks on the Song of Moses," Biblica 43 (1962), p. 327, note 1, criticizes the attempts of Albright (followed by Cross and Freedman) to restore in these passages a reference to "the land" or "the sea" (yam). This, he rightly notes, neglects the parallelism with the simile "feet like hind's feet" and the context -- a description of a warrior's prowess, not victories over mythological foes. See now the excellent study of J. L. Gresham, "wēdōrēk 'al-bāmōtē 'āres," CBQ 34 (1972), 39-53, esp. p. 49 on Hab. 3:19.

³

ANET, Suppl. page 540a. For the text see D. J. Wiseman in Iraq 20 (1958), 71: ki-i šá a-a-lu ka-šu-du-u-ni di-ku-u-ni.

S. Mowinckel, "Der achtundsechzigste Psalm," Avhanlinger utgitt av Det Norske Videnskaps-Akademii Oslo, II. Hist.-Filos. Klasse, 1953, No. 1 (Oslo, 1953), p. 77.

9

Against those who would translate "gives forth lovely fawns" it should be noted that ntn is not elsewhere used of "giving birth."

For another proposed solution see F. I. Andersen, The Hebrew Verbless Clause in the Pentateuch (New York, 1970), p. 44: "A hind is released, sheep of the fold are sold," comparing an Akkadian phrase immir-supūri "sheep of the fold" (ibid., p. 123, n. 5). The historical backdrop of this imagery remains rather obscure in any case, but would suit a tribe given to razzias.

10

That the message is one of victory is deduced only from the context in Psalm 68:12f.

11

This reading requires no consonantal emendation. The only alternative is to emend 9b to read y^clwt "mountain goats" (so G. R. Driver, "Studies in the Vocabulary of the OT, II." JTS 32 (1931), 255, followed by, among others, J. Jeremias, Theophanie: Die Geschichte einer Alttestamentlichen Gattung, WMANT 10 (Neukirchen, 1965), pp. 30-31, with reference to I Kings 20:27.

12

Compare also the imagery of the Sumerian text "The Message of Ludingira to his Mother" as cited by J. S. Cooper, "New Cuneiform Parallels to the Song of Songs," JBL 90 (1971), p. 160, "My mother is brilliant in the heavens, a doe in the mountains" (line 22).

13

Reading missayyād for MT miyyād.

14

See W. McKane, Proverbs, p. 318f.

15

See the remarks of E. Z. Melamed, "Break-up of Stereotype Phrases as an Artistic Device in Biblical Poetry," Scripta Hierosolymitana, VIII (Jerusalem, 1961), pp. 128-129.

16

A most important discussion of this and other pertinent passages is given by S. Mowinckel, "Drive and/or Ride in O.T.," VT 12 (1962), 278-299. His summary statement, which his discussion admirably supports with historical and archaeological evidence in addition to literary considerations, is given on page 284: "wherever we meet horses in connection with raekaeb (maerkābā, raekaeš) we are concerned with chariot horses, horse spans, not with riders on horse-back. The verb rkb in these contexts has to be translated by 'drive' or manage the horsed chariots." Mowinckel's note 3, page 284, lists the pertinent passages. His attempts to establish a meaning of "horse span" for every instance of prš(m) are not as successful. The division of the lexicons between "steed" (Is. 22:6; 28:28; Ezek. 27:14; Joel 2:4; Nah. 3:3; Hab. 1:8; I Sam. 8:11) and "horseman" elsewhere (i.e., charioteer) seem fully justified by the contexts.

17

Other passages to be considered here are Psalm 20:8; 76:7 (see Dahood); Is. 43:17; Jer. 4:13; 46:4; [Jer. 50:37]; Amos 2:15; Haggai 2:22; Hab. 3:8. Also Amos 6:12, "Do horses run on rocky land?" -- single horses do, but a chariot span cannot! Jer. 51:21 includes "horse and rider" along with "chariot and driver."

From the Persian period or later come references to "the horse and its rider," Zechariah 10:5 and 12:4.

Genesis 49:17 is problematical. Mowinckel understands it to speak of a rider on horseback (ibid., p. 288). Zobel, Stammesspruch, p. 18f., explains the verse as referring to a horse drawing a chariot. The "driver" is then thrown from his chariot by the rearing of the horse(s). This is obviously an attempt to preserve an early provenance for the verse, but in the absence of the mention of a chariot (as we would expect literary convention to include it) Mowinckel's view is to be preferred.

18

The difficulties of this verse are well known and have provoked extensive comment. See the commentaries.

19

Azitawadda boasts, "I have added horse to horse, shield to shield, and army to army" (ANET, 499b). Cf. Deut. 17:16.

20

Another passage containing a comparison between animals is Joel 2:4, where locusts are compared to horses "in their appearance." This observation is widespread, as witnessed by the German name for a type

of locust "Heupferd" and the Italian "cavaletta." See J. A. Thompson in the Interpreter's Bible, vol. VI (New York, 1956), p. 744. In the face of the explicit term of the comparison ("in their appearance") it is strange that Wolff, Joel, BKAT XIV, 2 (Neukirchen, 1969) p. 53, refers to "invincibility" as the tertium of the imagery.

²¹

NAB even translates here "the fleetness of men."
See also Amos 2:15.

Conclusions

The body of the study has given a rather complete but not exhaustive catalogue of Old Testament passages involving animal imagery and has drawn on the other Semitic literatures to illustrate the conventional character of much of this material. Various textual and exegetical problems have been discussed as they occur. The material there is not in every respect new, nor in many cases does it represent an advance in the study of individual passages. It has been included, however, to afford the reader a convenient gathering of this class of material and to bring out developments in the study of the text which are pertinent in individual cases, but would be cumbersome and distracting to any treatment in strictly systematic or summary form. As indicated in the introduction we offer here a summary of our findings along with a sampling of texts illustrating the devices by which animal imagery is cast in poetic form and accommodated to the line structure of Hebrew verse.

The most common type of line in Hebrew poetry is the bi-colon. The investigation of animal imagery discloses at once that the bi-colon is the most frequent unit of length used to convey such images. Since this unit of poetic measure is usually combined with the

stylistic accent of parallelism (parallelismus membrorum), a pervading duality is evidenced in this imagery. Thus the structure utilized by the poet most often imposes on him the choice in vocabulary of two nouns which will stand in parallel position. So, for example, Isaiah 51:8

kî kabbeged yô'k'elêm 'âš // w kassem r yô'k'el m s s 

For the moth shall eat them like a garment,

And the moth larvae shall eat them like wool.

Here then is a metrical unit of (3+3) within which the image is structured A B C // A'B'C' or in complete parallelism. When the same image is cast in the confines of a different meter, in this case (3+2) the poet utilizes a variant style to accomodate it, as in Isaiah 50:9

h n kull m kabbeged yibl  // 'âs yô'k'el m

Behold they shall all disintegrate like a garment:

The moth shall eat them.

The variation here has been in the use of a different verb in the first colon. The aggregate of the vocabulary, however, (beged, 'âš, yô'k'el m) assures us that we have the same image before us, and suggests further that it is not created ad hoc by the poet, but drawn from the stock of literary convention. The parallelism within the bi-colon may be considered A B C // D A*.

Simply by comparing the two verses, the basic image can be reduced to the vocables common to both verses, namely, "the moth shall eat (them) like a garment." This is confirmed by yet a third example of the identical image, with the same core vocabulary in one half of the bi-colon, and balanced in the other by a phrase retaining one word in common with Isaiah 50:9. The image is taken from Job 13:28

w^ehû' k^erōqeb^l yibleh // k^ebeged >akālā 'āš

He will disintegrate like a skin-bag,

Like a garment which the moth has eaten.

The wide variety of style achieved by the poet within the rather close confines dictated by structure is well illustrated by the following image, that of describing the ruins of a destroyed area as a lair of jackals.

w^enātattî 'et y^erūšalaim l^egallîm // m^ecôn tannîm

I will render Jerusalem ruins -- the lair of jackals (Jer. 9:10).

lāsûm 'et 'ārê y^ehûdâh š^emāmāh // m^ecôn tannîm

To establish the cities of Judah a wasteland; the lair of jackals (Jer. 10:22).

w^ehāytâh ḥāṣôr lîm'ôn tannîm // š^emāmāh 'ad ‘ôlām

Hazor shall become a lair of jackals, a perennial wasteland (Jer. 49:33).

w^ehāytâh bâbel l^egallîm // m^ecôn tannîm

Babylon shall become ruins -- the lair of jackals (Jer. 51:37).

In 9:10 and 51:37, both (3+2), aside from the designation of place, only the verb is different. When cast in a (3+3) line, more variation occurs, but the basic vocabulary is the same (šemāmāh, mē'ôn tannîm, place-name).

To return now to the "duality" of imagery in bicolon, we find that where two nouns are used, several patterns emerge that seem to have determined the choice of vocables.

A. TWO WORDS ARE USED WHICH ARE ALTERNATE DESIGNATIONS FOR THE SAME ANIMAL.

Fear not, o worm (tôla'at) Jacob,

O vermin (rimmat) Israel (Isaiah 41:14).

How much less man, who is a maggot (rimmâh)

And the son of man, who is a worm (tôlê'âh)
(Job 25:6).

All together they roar like young lions (képirîm)

They growl like whelps of lionesses

(gôrê 'arâvôt) (Jer. 51:38).

Mighty bulls (pârîm rabbîm) surround me,

Bulls of Bashan ('abbîrê bâšân) encircle me
(Psalm 22:13).

From Dan is heard the snorting of his horses
(sûsâyw)

From the noise of the neighing of his steeds
('abbîráyw) the whole land quakes (Jer. 8:16).

Behold, the people rises up like a lion (lābî'),
like a lion ('ařî) it rears (Numbers 23:24).

He makes Lebanon skip like a calf ('egeł)
Sirion like a young wild ox (ben r̄e'ēmîm)
(Psalm 29:6).

A pleasurable place for wild asses (p̄erā'îm),
a pastureland for onagers ('ařōdîm)
(Isaiah 32:14).

B. ONE TERM, USUALLY THE FIRST, WILL REFER TO THE
GENUS, THE SECOND TO THE SPECIES OF ANIMAL.²

Dan will be a snake (nāḥāš) on the road,
a š^ep̄ipōn-snake on the highway
(Genesis 49:17).

He has venom like the venom of a snake (nāḥāš)
like a deaf peten-snake which has stopped
its ears (Psalm 58:5).

A path which the bird of prey ('ayit) does not
know,

the eye of the falcon ('ayyāh) has not
seen it (Job 28:7).

The ravens of the wadi ('ōrbē nahal) will
pluck it out,

carrion-birds (bēnē nāšer) will eat it
(Proverbs 30:17).

Even a small bird (sippôr) finds a dwelling,
and a swallow (derôr) has a nest
(Psalm 84:4).

They will flutter along like a small bird
(sippôr) from Egypt,

and like a dove (yônah) from the land of
Assyria (Hosea 11:11).

- C. ONE TERM, USUALLY THE FIRST, MAY REFER TO
THE ADULT OF THE SPECIES, THE OTHER TO ITS YOUNG
Triumphant and riding on an ass (hâmôr)
--on an ass foal ('ayir ben 'atônôt)
(Zech. 9:9).

Just as the lion ('aryêh) growls --
the young lion (kêpir) over its prey
(Isaiah 31:4).

Like a lion ('aryêh) among the beasts of the
scrub;

like a young lion (kêpir) among the flocks
of sheep (Micah 5:7).

A multitude of camels (gêmâllîm) will cover you;
young camels (bikrê) of Midian and Ephah
(Isaiah 60:6).

- D. TWO DISTINGT KINDS OF BEASTS MAY BE MENTIONED
WHICH ARE SIMILAR IN SOME RESPECT, i.e., WHICH
SHARE THE QUALITY WHICH IS THE SUBJECT OF THE
METAPHOR.

He is to me like a bear (dōb) lying in wait,
 like a lion ('aryēh) in ambush (Lam. 3:10).
 Therefore a lion ('aryēh) from the scrub shall
 slay them,
 a wolf (zē'ēb) from the steppe shall destroy
 them (Jeremiah 5:6).
 They bear their riches on the shoulders of
asses (cāyārîm)
 --their treasures on the humps of camels
(gēmallîm) (Isaiah 30:6).

When an image is developed in two lines (a double bi-colon), these devices enumerated above may be extended to suit the structure, each unit occupying a full bi-colon. Examples for each category do not occur, but see, e.g., the following:

Does a lion roar in the scrub
 if he has no prey?
 Does a young lion give forth his growl [from
 his lair]
 unless he has caught something? (Amos 3:4).
 Even the stork in the heavens
 knows her proper times;
 A turtledove or a sîs 'āgûr
 keeps the time of her coming (Jeremiah 8:7).³

The suckling will play over the hole of the
peten-snake,

And over the den of a sip'ōnî-snake a weaned
 child will stretch out his hand (Isaiah 11:8).

As an alternative, the first bi-colon will introduce
 the specific image, while the second specifies the
tertium of the metaphor in more detail than is the case
 with an image confined to a single bi-colon.

His first-born bull has majesty

His horns are the horns of a wild ox.

With them he gores the nations,

He attacks (to) the ends of the earth
 (Deut. 33:17).

Behold a people that rises up like a lion;

like a lion it rouses itself:

It does not repose until it devours prey

--'till it drinks the blood of the slain
 (Num. 23:24).

My heritage has become for me

like a lion in the scrub.

She has let out her roar against me:

therefore I hate her (Jeremiah 12:8).

The ox knows its owner,

and the ass his master's stable,

(but) Israel does not have any knowledge;
 my people does not understand (Isaiah 1:3).
 I will be like a lion to Ephraim;
 like a young lion to the house of Judah.
 I myself will seize prey and pass on;
 I will carry off -- no rescue is possible
 (Hosea 5:14).

When uniform imagery extends beyond the double bi-colon, which is quite seldom, two types of development can be distinguished. The first device of the poet is to build up a list, by cataloging additional animals which fit the category of the image as initially introduced.

So, e.g., Isaiah 13:21-22:

And siyim will crouch there;
 Their houses will be full of pōhîm
 (hyaenas?).

Ostriches will dwell there,
 And satyrs shall cavort there.
'iyîm shall howl in its towers,
 And jackals in the pleasant palaces.

A second device is simply to join related images together in support of the tenor of his poem. Examples of this usage may be found in Isaiah 11:6-9 and 34:11-15, Amos 3:3-8, and, in a specialized form, the "numerical saying" admirably illustrated by Proverbs 30:24-28.

A notable syntactical feature of the development of a single image in strophes of varied length is the use of the 'av-ser-clause.

The remnant of Jacob will be among the nations,

In the midst of many peoples,

Like a lion among the beasts of the scrub.

Like a young lion amid flocks of sheep,

which ('av-ser), when he passes through,

he tramples

and seizes prey -- no rescue is possible

(Micah 5:7).

Just as the lion growls -

the young lion over its prey,

When ('av-ser) a band of shepherds

is called out against him;

And is not frightened by their noise,

nor daunted by their commotion,

Thus Yahweh of Hosts will come down

to wage war on Mt. Zion and on its hill

(Isaiah 31:4).

See also Nahum 2:12-13 and Proverbs 6:6-11.

Discerning the tertium comparationis in individual examples of animal imagery is not, in the majority of cases, difficult, as the comparison is usually quite explicit. So, for example, we find various groups of

persons likened to locusts, this likening specified by the notation that they are "without number" (see Judges 6:5; 7:12; Jeremiah 46:23). Jeremiah 12:8 gives the following:

My heritage has become to me like a lion in
the scrub -- she has let out her roar against
me.

We find phrases such as to "fly like an eagle" (Habakkuk 1:8) and "to leap like a stag" (Isaiah 35:6). Jeremiah (50:17) first cites a common image for a fugitive, that of a hunted sheep driven by lions, and then continues, in prose, "first the king of Assyria devoured him (Israel), and now at last Nebuchadrezzar king of Babylon has gnawed his bones." A particularly vivid set of metaphors is given by Hosea (13:7-8), and their import made frighteningly direct:

So I will be to them like a lion,
like a leopard I will lurk beside the way.
I will fall upon them like a bear robbed of
her cubs,
I will tear open their breast,
and there/then I will devour them like a
lion,
as a wild beast would rend them.

When explicit references to the tertium are lacking, there are, in the main, two principles of approach that can be helpful in interpretation: the strong element of conventionality in the poetic imagery of the Old Testament, and comparison with the imagery of other ancient Near-Eastern literatures.

Notes to Conclusions

1

See above, page 18.

2

We do not mean to imply that these terms correspond to present day technical taxonomic classifications, but rather represent what can be observed as a general classification of animals into smaller and larger groups.

3

See above, page 58.

Bibliography

In addition to a list of works cited, the Bibliography includes books and articles on the general subject which will be of interest to the researcher.

Vita

The author was born in Portland, Oregon, on August 29, 1939, and attended primary and secondary schools in Port Angeles, Washington, Stockton, California, and Oakland, California. He attended California Concordia College in Oakland, California, from 1957 - 1959 and completed undergraduate studies at Concordia Senior College of Fort Wayne, Indiana, from 1959 - 1961 with an academic concentration in Greek and Latin, receiving the Bachelor of Arts degree with distinction in 1961.

From 1961 - 1966 he was a student at Concordia Theological Seminary in Saint Louis, Missouri. In the summer of 1963 he participated in the University of Wisconsin Seminar in the Lands of the Bible. He received the Bachelor of Divinity degree in May of 1965, and continued with graduate work, majoring in Old Testament Studies and receiving the degree of Master of Sacred Theology in 1966 from the same institution.

The author began studies at the Johns Hopkins University in the Department of Near Eastern Studies in the fall of 1966. He received a fellowship under the National Defense Education Act, Title IV (1966-1969) and was a Gilman Fellow in the academic year 1969-1970. In the summer of 1968 he participated in the Concordia--

American Schools of Oriental Research Expedition at Tell Ta'anach, Occupied Jordan, with the assistance of a grant from the Zion Research Foundation. He served as graduate instructor of Hebrew during the fall semester of 1968.

Upon completion of residence requirements and class work in 1970, the author was ordained as a minister of the Lutheran Church--Missouri Synod and currently serves as Assistant Pastor at Immanuel Lutheran Church of Baltimore, Maryland.
